**PRO-BOERS.**

Crowd Starts a Demonstration in Brussels Against British.

Brussels, June 29.—A great pro-Boer demonstration followed the lecture delivered at the Alhambra Theatre this evening by Andre Dewet, a cousin of General Dewet the Boer commander. The crowd unharnessed the horse from the lecturer's carriage and drew the vehicle to the hotel. After the oration to the lecturer the crowd started for the British legation, but was dispersed by the police.

**INSANE WOMAN.**

Elkhorn, Man., June 29.—(Special).—The wife of Adam Campbell, Two Creek settlement, killed her five-year-old child and then attempted suicide, being found in a dying condition, with her throat cut.

## Proves a Surprise

**Shamrock II in Trial Race Is  
Speedier Than Before  
Accident.**

**She Runs Away From Her Name-  
sake in a Fourteen Knot  
Breeze.**

**Her New Mast Seems to be Stiff  
Enough to Stand the  
Strain.**

Rothsay, Pirth of Clyde, June 29.—Shamrock II, and Shamrock I, had their first trial this afternoon since the former was wrecked. A steady 12 to 14 knot breeze was blowing when the yachts left their anchorage under mainsails. Before they were out in the bay jib topsails were set and the boats reached out together in great form. The Kariad, under similar canvas, accompanied the Shamrocks, but the latter immediately took the lead and the Kariad abandoned the trial race. The sea was fairly smooth, and the Shamrock II, pulled ahead and led the way round Bogony Point, gradually increasing the gap until she was three lengths ahead. The boats then reached along the Bute shore from Bogony to Asseg, three miles. They had a fair racing trial, and the challenger dropped the older boat in a fashion she has never before been able to accomplish. Over the three miles the challenger opened out a big lead, probably of from a minute to a minute and a half, but timing was impossible as she was thrown into the wind to await the older boat's coming up. The two yachts were afterwards sent off toward the harbor by agents. The challenger opened out all the time and carrying her canvas, her lee rail well clear of the water, she set a pace which the former challenger was unable to contend with. The new canvas of the Shamrock II, set to perfection. The mast also seemed stiff enough to stand the strain. The result of the day's sailing is regarded by yachtsmen here as indicating that the challenger is a considerably improved boat. Sir Thomas Lipton said to a representative of the Associated Press today: "I sailed on the Shamrock II, purposely to be better able to criticize her performance under her new rig, and I was well pleased with all I saw. Her new pole mast seemed quite able to do its work, and her sails so far as I could judge, are perfectly satisfactory. The new boat has done all I expected, and probably a little more. I do not care to express an opinion based solely on a day's sail, but the Shamrock II, had absolutely no difficulty in beating the Shamrock I, on any point in the resumption of the trial races today."

**LARGEST ON RECORD.**  
Nanaimo's Customs Returns for Year Are Satisfactory.  
Nanaimo, June 29.—(Special).—The customs collections for June were \$7,292.25, compared with the fiscal year, \$100,245.28, the largest on record for Nanaimo custom house. Coal exports for June: New Vancouver Coal company, 34,001 tons; Lady Smith, 28,703 tons; Union, 12,923 tons; Maitland, 9,943 tons; Wreck Bay, 9,943 tons; Chemainus lumber shipments, 3,838 tons measurement one million and twenty-five thousand feet of logs. The post office at Departure Bay was closed permanently tonight, by order of the department. There is a strong probability of the establishment of a post office at Extension No. 1. The local firms will hold a mass meeting to consider whether they will continue the scheme of colonizing Malacca Island with the pulp company as neighbors or arrange a new plan for settlement of a large number of their countrymen exclusively. The taking of evidence in the Hodgson-Wargo case was finished here by the taking of Magistrate Narwood's evidence. Superintendent Huxley left on the afternoon train with all the papers for submission to the government. Anthony Anderson, a well known insurance man, returned from Wreck Bay which he describes as the most wonderful gold mining camp he ever saw in an extended experience. He saw a clean-up of one machine for one day, when over seven hundred dollars was taken. The company officials do not talk much to strangers about operations, but no doubt about marvelous returns from each clean-up. From what he saw and learned he believes Wreck Bay is a second Klondike.

**NORTH NANAIMO.**

Meeting of Settlers Held at Parksville School House.

Parksville, June 29.—A meeting of the settlers of the north end of North Nanaimo electoral district was held in the school house, at which the following motions were carried: Moved by Mr. T. Hillier, seconded by Mr. Mills, that although the settlers did not like the manner in which the election had been taken out of their hands, this meeting expresses a vote of confidence in the capabilities of Mr. A. Hirst, the newly appointed road foreman, the same as in other districts. Moved by Mr. T. Hillier, seconded by Mr. G. Parks, that the secretary be instructed to write to the Chief Commissioner of Lands and Works and ask why a meeting was not called to elect a road foreman, the same as in other districts. Moved by Mr. T. Hillier, seconded by Messrs. Plummer, L. Craig, R. Hamlin, Morrison and Kineade, be formed and given power to call meetings at any time in matters referring to road work and other things relating to the interests of the settlers.

**GUY W. PONSFORD,**  
Secretary pro tem.

**THE OPHIR.**

Expected to Arrive at Halifax on September 20.

Halifax, June 29.—Steamer Ophir is to arrive at Halifax on September 20. The Juno and St. George, warships, accompanying the Ophir, are expected on the 14th, and with the Ophir will lie here while their Royal Highnesses are touring the Dominion. The homeward voyage begins in October.

## FAMILY QUARREL.

Results in the Killing of One Man and Another Wounded.

Kansas City, June 29.—A special to the Star from Catoosa, I. T., says that at Waver, a small place south of here, four men and a woman engaged in a family quarrel. One of them is dead, another is fatally wounded and the others are in hiding. The dead is Dave Boulton, and the wounded one is his brother Walter. Eight shots were fired by Robinson Boulton at the brothers, five of which took effect. Wm. Smith and John Elliott, who witnessed the affray, say that George C. Boulton and his wife and Robinson Boulton quarrelled with David and Walter about crops, when George gave Robinson a revolver and told him to kill the brothers. Robinson at once began to shoot at David, the third shot killing him. Meanwhile Walter fled on foot. The assailant reloaded his revolver, mounted a horse and pursued the fleeing man, overtaking him and began firing. Four of the shots took effect. Robinson and George Boulton and wife then hitched up a team and drove rapidly from the scene.

## THE DUTCH BRANCH.

It Joins the Boer Leaders as Members of Arbitration Union.

The Hague, June 29.—The formal institution of the Dutch branch of the international arbitration union took place today. Messrs. Kruger, Wessels, Fischer and Wolmarans were appointed honorary members. The meeting decided that it would be of no use to seek the mediation of The Hague for a settlement of the South African troubles.

## Vacant Seats In Commons

**Six By-Elections Necessary in  
Various Parts of the  
Dominion.**

**Dates Will Probably Be Fixed  
For Same Day in the  
Fall.**

From Our Own Correspondent.

Toronto, June 29.—Six seats in the commons are vacant. They are:

West Durham, where the court has discovered corrupt practices to have existed in the late election.

West Hastings, where Mr. Corby resigned.

Beane, opened by the resignation of Dr. Goulbourn to accept a seat in the senate.

L'Islet, opened by the appointment to the senate of Mr. Dechenne.

St. James division, Montreal, caused by the elevation of Mr. Desmaris to the bench.

York, N. B., where Mr. Gibson was unseated for corrupt practices by agents. In none of them are the parties ready with their candidates, so it is probable that elections will not be brought on before the fall, and then all together. In West Durham and West Hastings the majority of votes cast at the general election were for the Conservative candidates. In the former case, Mr. Thornton was not permitted to take his seat owing to an irregularity in his deposit, which was not in cash, as law required. In West Hastings, Mr. Corby, Conservative leader in that part of Ontario, won by a majority well on to the thousand, but sent in his resignation. The other three seats were held by supporters of the government.

Quebec, June 29.—(Special).—The West Assiniboia election petition has been dropped. Walter Scott is safe in his seat.

Winnipeg, Man., June 29.—(Special).—An application has been made to the courts to commit R. L. Richardson, M. P., to jail for contempt of court for comments made in his paper, the Tribune, during the progress of the Lisgar election trial.

**THAT FLAG  
INCIDENT**

**Not Much Importance Attached  
to the Matter at Wash-  
ington.**

Washington, D. C., June 29.—The state department has not received any representation concerning the flag incident at Skagway where much excitement is said to have been caused by the hauling down of a British customs flag raised at that point. Based on the press reports of the affair, the officials do not attach serious importance to the incident itself, although it is recognized that the matter might assume importance if the raising of the flag was an assertion of British sovereignty over that locality. In that event there is no doubt that the state department would take cognizance of the matter. But as it stands, the flag appears to be that of the customs for the designation where customs may be paid and not the British emblem indicating any claim of sovereignty.

**FOUND DEAD.**

**C. P. R. Detective's Body Discovered  
Near the Track.**

Fort William, Ont., June 29.—(Special).—The dead body of a man was found four miles west of Schreiber yesterday afternoon by a C. P. R. telegraph inspector. The dead man was one of the detectives sent up from the east by the company to watch the track. His name is Montpelier, and when last seen he was taking a gang of Italians to Wolf river, and it is not known whether he fell off or was pitched off the train. The body was brought up to Port Arthur for burial.

**GAS EXPLOSION.**

**W. Tierman Badly Injured by Accident  
in Cannery.**

Vancouver, June 29.—(Special).—W. Tierman, Mount Pleasant, was the victim of an acetylene gas explosion at the Albion Island cannery yesterday. He is in a critical condition. One leg was broken and the other injured by the tank striking him. He is at the city hospital.

A large quantity of the salmon offal will be utilized this year by the Canadian Pacific Fish Oil and Guano company, who will operate on a large scale.

## Heat Is Deadly

**Great Portion of United States  
Sweltering Under the Sun's  
Rays.**

**Immense Amount of Suffering  
Caused in New York and  
Vicinity.**

**As Many Men and Horses Kill-  
ed As If Battle Had  
Raged.**

Washington, D. C., June 29.—Practically the entire east, except in the Gulf States, is sweltering under a hot wave today. In the upper Mississippi valley, the lower Missouri valley and the upper lake regions, where at various points during the past 24 hours the mercury has reached high into the 90's and in some instances well past the 100 mark. There has been a decided fall in temperature today, accompanied by thunder storms. In the extreme west the temperature is moderate today. The tendency, however, is toward warmer weather in the west except on the Pacific Coast, where it will remain cool.

The warmest point officially in the United States is at Yuma, Arizona, which scored 88 at 8 o'clock this morning, but this is usual here. Except for this, Nashville, Tenn., records the maximum temperature with 84 at 8 o'clock. St. Louis, Baltimore, Memphis, Oswego, New York and Key West, 83 each.

New York, June 29.—The people of this and other cities and villages are anxiously awaiting the arrival of the relief from the present hot spell, which is promised by the weather bureau in the shape of thunderstorms. Today's heat added to that of the last few days, caused an immense amount of suffering to humanity, while there were numerous prostrations and several deaths. Among the last was a case of suicide and two attempts which were indirectly attributable to the hot weather. The record up to 9 o'clock tonight shows 11 deaths and 29 prostrations. In addition 200 horses died and the number prostrated was legion.

The highest point the government mercury reached during the day, 92 degrees, came at 4 o'clock in the afternoon.

**SIR THOMAS GALT DEAD.**

Formerly Chief Justice of Ontario Court of Common Pleas.

Toronto, June 29.—(Special).—Sir Thomas Galt, late chief justice of the Court of Common Pleas, died this morning at his home, 99 Pembroke street. For weeks he had been in feeble health and his death was not unexpected.

Sir Thomas Galt was born in London, England, in 1815, and came to Canada in his 18th year. He was called to the bar in 1841 and in 1845 and in 1869 was raised to the bench. In 1887 he became chief justice of the Court of Common Pleas, was knighted in 1888 and retired from the bench in 1904.

**TO OPEN PAVILION.**

Hon. Dr. Borden Asked to be Put Off at Buffalo.

Ottawa, Ont., June 29.—(Special).—Hon. Dr. Borden with a staff of eight officers left for Buffalo tonight to open the Canadian pavilion at the Pan-American on Monday.

A parcel post convention had been arranged between Canada and Mexico, but had to be canceled owing to the States objections to closed parcels entering that country.

Striking car conductors made a hostile demonstration this morning at an establishment of one of the employees who will not agree with union demands.

**MAXIMO GOMEZ.**

Reaches New York With Party and is Cheered.

New York, June 29.—General Maximo Gomez arrived in this city this afternoon with his son Urban and Alexander Gonzales, private secretary to General Wood. A number of Cuban and American patriots met him at the Waldorf-Astoria hotel for the purpose to greet him and cheered him heartily. He smiled and spoke gratefully to a number of men and women. He looked very well. The party met Senator Estrada Palma, of the Cuban Junta and representative of the Cuban revolutionary party, who took them to the Waldorf-Astoria hotel.

**UNCLE AND NEPHEW.**

Alexander Allan Dies the Day of His Uncle's Funeral.

Montreal, June 29.—(Special).—The funeral of the late Andrew Allan took place this morning, service being held in St. Paul's church, Rev. M. Doubilet officiating in the absence of Rev. Dr. Barry. The remains were interred in Mount Royal cemetery.

Brookville, June 29.—(Special).—Alexander B. Allan, son of the late Sir Hugh Allan, died rather unexpectedly at his home here this morning, aged 50 years. He had been ill for some time, but at midnight acute kidney trouble developed.

**MORE STRIKES.**

All the Union Sheet Steel Workers Are Ordered Out.

Pittsburg, June 29.—A definite order for a general strike of all union steel workers was issued by President T. J. Shaffer of the Amalgamated Association of Iron, Steel and Tin Workers today. There are over 20,000 affected by the order, and every mill operated by the American Steel Company, where union men are employed, throughout the country, will close down indefinitely, or until such time as a settlement of the matter in dispute has been reached.

**OLD COUNTRY REVENUE.**

A Large Increase for the Quarter Just Ended.

London, June 29.—The revenue returns for the United Kingdom for the quarter ending June 30, show an increase from all sources £3,481,065 and a net increase of £3,083,102 over the returns for the corresponding quarter of 1900. Of the increase £2,440,000 is derived from the income tax and £727,000 from the customs.

## Heavy Cargoes Going North

**Islander and Danube Will Both  
Be Heavily Laden With  
Freight.**

**Warships Leave for Vancouver  
—Princess Louise Due From  
the North.**

Although the arrivals and departures were few, other than the regular daily steamers, yesterday, the waterfront had a busy appearance, for the truckmen were in procession on the wharves and the sheds were being filled with freight for the Northern steamers and for the Queen City, bound to the West Coast. The Islander, which sails at 8 a.m. tomorrow, is loading freight at Turner-Becton's wharf, and the sheds there are filled with pyramids of groceries and merchandise, the regular shed being crowded and recourse having to be made to the adjoining sheds to accommodate the freight which the shipper were carting to the wharves. Outside on the wharf, too, there are much freight, a large shipment of boilers being piled up there awaiting the sailing of the Danube on Wednesday, which represents a value of several thousand dollars. These boilers, fourteen in number, ten of which are large-diameter, each weighing several tons and the others, smaller upright boilers, were manufactured at the Albion Iron Works, and are being shipped to Dawson for McLennan & McLeod.

So much freight is there on the wharf and waiting to be trucked down, assigned to Skagway and interior points, that it is a question whether the steamers Islander and Danube can carry it all. When the Danube sailed on her last trip she could not carry another two tons, and when she leaves on Wednesday night she will be as full of freight as a woman can pack a trunk. On her arrival yesterday from the North she proceeded to Skagway's mill to have the lumber shipments placed along the bottom of her hold, and then the boilers and groceries will be loaded after the Islander has been loaded as thoroughly as possible, for space must be left on her for the accommodation of a large shipment of cattle, which is to be loaded at Vancouver. The Islander will take a shipment of whiskey and beer, shipped to Lewin Bros., of Dawson, by Turner-Becton, which aggregates sixteen tons. Simon Leiser, Wilson Bros., T. Earle, S. J. Pitts and other local grocers have also large shipments of groceries on the wharf, and when the hatches are placed on the holds of the two northbound steamers, there will be room for little other freight.

The Queen City, which commenced loading yesterday for her trip to the West Coast tomorrow night, will also have a large freight. She will carry a large shipment of bricks to Hayes camp, together with sixteen tons of iron pipe and metal for the improvements being made at that mine, and there will be many large shipments of groceries and merchandise for the different coast points between Victoria and Alouset.

### A NEW FREIGHTER.

**Steamer Trader Will Arrive Today—  
Princess Louise**

Steamer Trader, the latest addition to the local freight fleet, and perhaps the best vessel of the fleet of small freight steamers to be operated between Victoria and Vancouver and other local runs, will arrive today from Vancouver, where she has just been launched by Mr. C. S. Baxter, formerly general passenger agent, and who has entered the general forwarding business in connection with his other local interests. The Trader is a freight steamer of about two hundred and fifty tons capacity.

Another vessel, expected to arrive today, is the steamer Princess Louise, which is the back from Naas and way ports of Northern British Columbia. Further news will be received by the steamer of the outbreak of smallpox on the Naas and Skeena. According to latest advices received by the Islander, the standard cannery where some cases were found among the Indians has been quarantined by Dr. Gibbs, the government doctor.

### FLEET LEAVES ESQUIMAULT.

**Warships Have Gone to Vancouver for  
The Dominion Day Celebrations.**

The flagship Warspite, accompanied by the ship-of-war Concorde and torpedo boat destroyer Virago, as well as torpedo boats 39 and 40—a fleet which presented quite a picturesque appearance—left yesterday for Vancouver, and the cruisers Amphion and Leavis, which were at Camox have proceeded from that port, to go to the Mainland to take part in the Dominion Day celebrations there. The Warspite will reach at Vancouver on July 13, when she will leave on a cruise around Vancouver Island, and thence back to Esquimault. The Leavis will return from Vancouver to Esqui-

mault about July 16, to complete defects, and the Esquimault will remain for surveying work immediately after the celebrations. The Concorde will part company from the flagship about the middle of July, and will leave for Behring Sea to patrol. The flagship is due back at Esquimault on July 20.

### BRINGS GRANITE.

**Constance Lands Granite at Fleming's  
New Yards.**

The tug Constance arrived yesterday morning from Nelson Arm, bringing a scow with 250 tons of granite from the well known quarries there for J. W. Fleming's stone yard in the upper harbor, where many improvements on the waterfront have been made recently, a breakwater having been built and a large area reclaimed which has been made for Mr. Fleming's stone yard, where there are many sheds and a large stock of granite is being laid in for sale to local builders and for contract work.

### MARINE NOTES.

Capt. Uley, of the bark Low Wood, who is in the Royal Roads waiting to be hauled out for repairs, is to leave for the eastern coast, having been transferred by his owners to another vessel of the Tropic line of sailing vessels, the Nellie A. Tropic, and another master is being sent out from the east for the Low Wood. She will be hauled out after the Potlatch, which follows the schooner Honolulu on the Esquimault Marine ways. The Low Wood is a stripped, caulked, sheathed and painted, a work which will involve considerable expenditure.

Steam collier San Mateo passed yesterday to load for San Francisco.

The bark J. D. Pelt passed out on today from Ladysmith with coal for St. Michael.

### TO FORTIFY SYDNEY.

**Canada's Eastern Coal Supply at Present  
Unprotected.**

From Montreal Witness.

Mr. George H. Dobson, a distinguished member of the North Sydney Board of Trade, is well known as a writer upon transportation and other commercial questions, and his pamphlet entitled "Modern Transportation and Atlantic Express Tracks," has been widely read. Mr. Dobson is passing through the city on his way to the Dominion Day celebration at Cape Breton, and he pointed out the extreme importance of fortifying Sydney harbor by means of a canal, and its development during the past two years would be a fair example of a work which will involve considerable expenditure.

## Architects To Compete

**School Trustees Offer Prizes  
for New High School  
Plans.**

**Miss Cameron's Case Comes Up  
Again and Is Further  
Postponed.**

A special meeting of the board of public school trustees was held last night in the board room, city hall. There were present Chairman Leach, Messrs. Brown, Belyea, Drury, Huggert, Brown and Jay and Superintendent Eaton.

The special joint committee from the board of trustees and board of directors of the British Columbia Agricultural Association reported as follows:

To the Board of Management of the British Columbia Agricultural Association:

The following memorandum of resolutions, carried by special committee on education, was respectfully submitted for your consideration:

1. That whatever competition there may be shall be open to the provincial public schools.

2. That any private school wishing to make an exhibit may do so, but the exhibit

shall not compete with the public schools.

3. That the exhibit be divided into four sections—the junior, intermediate, senior and High school sections.

4. That the department of education be requested to furnish a general departmental exhibit.

5. That writing be one of the subjects in the junior, intermediate and senior sections, that map drawing be one of the subjects in the intermediate, senior and High school sections.

6. That an exhibit of mechanical sciences, correctness of solution and neatness of work be taken into consideration in judging exhibits; that clay modelling, paper work and cloth sewing be included as subjects for exhibit.

7. That the maps for the drawing exhibit be for—  
High school, "British Empire,"  
Senior grade, "Canada,"  
Intermediate grade, "British Columbia."

8. That all exhibits shall be done in school, and the teacher is requested to sign the same as a certificate that the work has been done under his or her supervision.

9. That individual prizes be awarded for each of the divisional exhibits.

10. That a diploma be given to the best class work in each exhibit in each section.

11. That the individual prizes be bronze medals.

A. L. BELYEA, Chairman.  
AGNES BROWN, CAMERON, LEACH, DRURY, HUGGERT, BROWN, JAY, EATON, SUPERINTENDENT.

The building and grounds committee reported as follows:

1. That the tender for repairs to the four of South Park school has been awarded to A. Shier, the lowest tender, the price being \$140.

2. That the contract for kalsomining in the different school buildings has been awarded to E. A. Lewis, at the price of 4 cents per yard for hard finished walls and 6 cents per yard for sand finished walls.

3. The contract for alterations and additions to Kingston street school has been awarded to Mr. Wills, the lowest tender, at \$245, with \$23 additional for books and seats.

4. A contract has been awarded to D. E. McCrimmon, the lowest tender, for four platforms, at \$6.75 each, and flooring at \$27.50 per m., including removing and replacing desks.

As to the new high school building, the committee submits the following conditions of proposed competition, with the recommendation that they be adopted by the board:

1. Victoria architects are invited to submit designs in competition for the new Victoria high school building, one of whom will be selected, as hereinafter provided, to carry out the work on the usual terms; and authors of the next two plans in order of merit shall receive \$200 and \$100, respectively, as some recompense for their trouble.

Then follows the conditions and requirements to be observed by the competitors, particulars of which will be furnished on application to Mr. Eaton. The designs are to be submitted at or before noon of July 22.

The building will cover exactly the same space as the South Park school, 60x140, and will contain 8 class-rooms, capable of accommodating 40 pupils each.

The report was considered clause by clause and adopted. There was a lengthy discussion as to the size and number of the class-rooms, and it was finally decided to leave the settlement of that question to the building and grounds committee, the universal feeling expressed being that the greatest possible floor space be given to the pupils, while keeping the total expenditure within the appropriation of \$27,000, the amount to be spent on the building.

Mr. Eaton called the attention of the board to the number of cases of contagious diseases which had occurred during the past term and asked authority to have the schools thoroughly fumigated. Granted.

Trustee Drury felt hurt at the remark of the trustees that he had attended the closing exercises at the South Park school. He said some people seemed to think it had something to do with the recent trouble, which was absurd. He had visited three of the schools on Friday and had not time to get to the South Park.

Trustees Jay and Belyea said they had gone to the South Park, thinking the exercises took place in the forenoon.

Trustee Brown asked what disposition was to be made of Miss Cameron's letter, asking for an investigation of recent charges made against her, which

had been laid on the table at last meeting.

Trustee Jay said he understood from Miss Cameron that she was writing a letter of explanation to the board and he was surprised to hear that one had not been received.

Trustee Huggert thought her request for an investigation should be granted.

Trustee Belyea said if an investigation was granted, it should be thorough and searching, so that the whole truth should be brought out.

Trustee Huggert had advised Miss Cameron to answer the chairman's letter and he was surprised that she had not done so.

Chairman Hall would not support the granting of an investigation until Miss Cameron should pledge herself to submit to the board and its decisions in the future.

Trustee Brown considered that Miss Cameron had been adjudged guilty of insubordination without sufficient evidence and was entitled to an investigation.

Trustee Huggert said an investigation could do no harm and it would allay public feeling in the matter.

Trustee Jay pointed out that Miss Cameron had not asked for an investigation but for a public hearing before the board.

Trustee Brown moved that Miss Cameron's letter be taken from the table and considered.

There was no second to this and a motion to adjourn carried.

OPENING OF THE OGLAIE BRIDGE ACROSS THE KLONDIKE RIVER AT DAWSON.

## Ready For Year's Work

**Officers Elected by the Execu-  
tive of the Women's  
Auxiliary**

**Addresses on the Proposed Ma-  
ternity and Children's  
Wards.**

The executive committee of the Women's Auxiliary society, Royal Jubilee hospital, met on Friday at the city hall for the election of officers and for other business. Mrs. E. B. Marvin being voted to the chair, the treasurer's report for the year ending June 30, 1901, was received and approved as follows:

RECEIPTS.  
Balance in bank, June 30th, 1900, \$10.00  
Cash in hand, June 30th, 1900, 3.00  
Membership fees and donations, 304.00  
Net result of garden party, 250.00  
Net result of ball, 655.00  
By Ladies' baseball team, 40.00  
Mr. Edwin Johnson, 10.00  
Sale of books, 8.00  
Special Christmas fund, 15.00  
Professor Wickens, 80.00  
Mrs. Bradley Dyne, 10.00  
Total, \$1,455.71

EXPENDITURE  
By cheque, \$522.00  
By cash, 25.00  
Furnishing doctor's house, 485.00  
Christmas fund, 15.00  
Paid to fund for children's ward, 15.00  
Professor Wickens' dues, 80.00  
Total, \$1,455.71

Balance in bank, June 30th, 1901, \$100.16  
This does not include the sum of over \$100 spent by the associate society, the Daughters of Pity.

Fees paid for year commencing July 1st, 1901, 22.00  
Balance in bank July 1st, 1901, 122.16  
SPECIAL FUND MATERNITY WARD.

List of subscriptions up to date:  
Lady Joly de Lotbiniere, 50.00  
Mrs. Robert Dunsinuir, 50.00  
Mrs. P. S. Barnard, 50.00  
A. Constant Friend, 25.00  
Lady Crease, 20.00  
Mrs. J. H. Brown, 20.00  
Mrs. Bradley Dyne, 10.00  
Mrs. Robert Robertson, 5.00  
Mrs. J. S. Barnard, 5.00  
Mr. Davidge, 10.00  
Messrs. Leach & Leiser, 10.00  
Messrs. Brackman-Ker, 25.00  
Mrs. P. S. Barnard, 25.00  
Mrs. A. W. Jones, 5.00  
Dr. Ernest Hall, 7.00  
Mr. Green, 2.50  
Mr. J. Anderson, 5.00  
Mr. James Pattison, 5.00  
Mr. Green, 2.50  
Staff of the Canadian Bank of Com., 22.50  
A friend, 1.00  
A friend, 1.00  
Total, \$344.00

The total collections made during the year by the Women's Auxiliary, amount to the sum of \$1,799.71.

The election of officers next proceeded with, and Mrs. A. T. Smith was unanimously re-elected president; Mrs.

Rocke-Robertson, vice-president; and Mrs. D. M. Eberts and Mrs. E. Tilson, honorary vice-presidents representing sister societies. Mrs. Edward Hasell was re-elected secretary-treasurer, and Mrs. W. Bully was appointed assistant secretary-treasurer.

The date for the annual garden party was next discussed, and after deferring to the board of directors, and the securing of the proper patronage, Friday, the 24th of July was named as a suitable day. The secretary was directed to attend to the two former matters, and then to call a meeting of the executive committee and all friends willing to help on the occasion at the hospital on Friday, July 13.

While thanking Mr. Hartnagle most sincerely for his kindness in permitting

only that sufferers have been relieved, but also that many of our citizens have cheerfully contributed to that end. You, of course, appreciate the fact that besides contributing to the comfort of the sick, your efforts also incite and develop the generous impulses of the strong, and afford a convenient channel through which those impulses may find effective expression.

The latter is not less important than the former. It is very desirable that there should not be any unnecessary suffering but it is not less desirable that the fortunate should be awakened to their obligations to improve the conditions of their less fortunate fellows.

The greatest moral entity that could befall the race would be the recognition of selfish individualism as the legitimate

PROSPECTS IN THE LAIDEAU.

A Revel-toke paper points out that to those in the Lardau district who anticipated figuring on a "boom" this season before the railway actually reached the foot of the lake, the present comparative inactivity is somewhat of a disappointment. While, however, little fresh capital is at present finding its way into the district, the season being backward and the prospects of immediate railway building uncertain, though a force of two hundred men is now engaged at grading, a considerable amount of mine development work is in progress, and several of the better developed properties are preparing to ship.

The owners of the Tribune propose to send 50 tons of ore shortly to Trail, the shipment of 80 tons last winter having netted nearly \$25,000, deducting freight and smelter charges, while at the Silver Cup an important new strike is reported in the 400-foot level. The London and British Columbia companies have taken a bond on the Lexington properties in the Lardau, when two quartz veins from 10 to 16 feet in width have been located carrying gold running to about \$20 to the ton, and the Nellie J., Tombik Eagle, Black Vulture and other companies are making preparations to make the best of the season which has started late.

Lady (to clerk in a sister class). I want a pair of trousers for my husband. Clerk—What size, madame? Lady—I don't know the size, but he wears a fifteen collar—July Smart Set.

the use of the Driad drawing room for the monthly meetings of the society, it was decided—on the motion of Mrs. Redfern—to hold them for the future at the city hall, as being more convenient for the conduct of business.

The secretary reported having received a visit from the committee of management, Metropolitan Methodist church, regarding the Kermess to be held by them in October. In view of the largeness of the undertaking, and believing that the assistance of the Women's Auxiliary (who are to receive half the net proceeds) would aid in its success this committee invited the ladies of the hospital societies to assist by taking charge of two of the booths, viz: the Scotch and the Canadian. It was unanimously resolved that the ladies of the auxiliary, assisted by the Daughters of Pity, should accept this invitation, and carry it out to the best of their ability.

This report includes a complete list of subscribers up to date, to the Queen Victoria Memorial Ward for maternity cases, which is the next special undertaking of the Women's Auxiliary society, and regarding which the Rev. B. C. Allen so eloquently addressed the general meeting here last Tuesday. Mr. Allen said that no more fitting memorial could be conceived to her, who if great queen,

care in the exercise of her royal prerogatives had ever been the relief of suffering, and the elevation of womanhood. He pointed out that especially in the outlying districts there was not only unnecessary suffering but degradation, in the fact that a woman's environment on ranches and in country homesteads was totally inadequate to give her the rest and privacy so necessary for the recovery of health and strength, besides the fact that doctors and nurses were often quite out of reach. Mr. Allen told most keenly how when visiting a woman in a maternity hospital a little while ago, she said to him "This is the first I have seen of a woman who as long as she is at home can never rest, can only be fully appreciated by those who know how it is more than true in many colonial homes that

"Man's work endeth with the sun,  
Woman's work is never done."

This appeal is made to every woman in the province, city, and district. If every woman will contribute one dollar towards this object, and to the beloved memory of that Queen who will live forever in the memorials of charity and goodness, which she has left behind her, the maternity ward at the Royal Jubilee hospital might be commenced at once, or at least in time for H. R. H., the Duchess of Cornwall and York, to lay its foundation stone. Mr. Allen said that with earnest women to will was doing, the Daughters of Pity, no doubt whatever either of the earnestness or of the will of the women of Victoria.

The Rev. Elliott S. Rowe made the following address on the Children's Ward, proposing a scheme to meet the difficulty of maintaining it after built and furnished.

I am very glad to have had the opportunity of attending this meeting today and I feel it a great privilege to be associated in any way with so humane and worthy an enterprise as that which engages the attention of your organization.

It is a great pleasure to me to learn that your society has had another prosperous year, for the fact indicates not

only that sufferers have been relieved, but also that many of our citizens have cheerfully contributed to that end. You, of course, appreciate the fact that besides contributing to the comfort of the sick, your efforts also incite and develop the generous impulses of the strong, and afford a convenient channel through which those impulses may find effective expression.

The latter is not less important than the former. It is very desirable that there should not be any unnecessary suffering but it is not less desirable that the fortunate should be awakened to their obligations to improve the conditions of their less fortunate fellows.

The greatest moral entity that could befall the race would be the recognition of selfish individualism as the legitimate

## Helmet of Navarre.

This is the story which has been appearing serially in The Century Magazine and has attracted wider attention and been more highly praised than any of its predecessors. As the first book of a young writer, it is certainly remarkable. The title calls it "a remarkable performance, not only for a young writer, but for a writer of any age." It is a narrative of intense and sustained interest. The scene is laid in Paris during the invasion of the city by Henry of Navarre, and the story occupies but four days of the work preceding Henry's entry to give his formal adherence to the Catholic Church. The author's remarkable fertility of invention crowds the story full of plot and subplot natural to the violent times, to the clash of faiths, and to the rivalry for the hand of a court beauty known as the "Rose of Lorraine." It is a fresh, engaging and well-sustained addition to romantic fiction.

Other new books are: "The Crisis," Winston Churchill; "Observations of Henry," Jerome K. Jerome; "Work," Zola; "Dom Castle," Neil Munro; "Grustark," McCutcheon; "Pro Patria," Max Pemberton.

All the above are in our lending library.

## Treatment Of

Dumb Animals

Sermons to be Preached Today  
on Work of the S. P.

C. A.

Library Sunday at the Centennial Methodist Church—

Musical Portions.

At the request of the Society for the Prevention of Cruelty to Animals, the pastors of most of the city churches will today preach sermons touching on the work of the society, and in some of the district churches the discourses will likewise deal with the aims and objects of this most useful institution. Answers to the request were received from the following: The Bishop of Columbia, who will preach at Duncan; Ven. Archdeacon at Cumberland; Rev. W. Baugh Allen, the Chennais; Rev. J. W. Plinton, St. Luke's; Cedar Hill; Rev. John Grady, St. Mark's; and the following in the city churches: Rev. Canon Beaudin, in Christ Church cathedral, morning and evening; Rev. Percival J. Smith, St. John's; morning; Rev. Ernest G. Miller, St. Barnabas; morning; Rev. J. H. Sweet, St. James's; Rev. Elliott S. Rowe, Metropolitan Methodist, morning; Rev. Dr. Wilson, Church of Our Lord, morning; Rev. Dr. Campbell, First Presbyterian, morning; Rev. Leslie Clay, St. Andrew's; Rev. Wm. Barradough, B. A., Centennial Methodist, morning; Rev. H. B. Blyth, Congregational, morning; Rev. L. Tait, St. Paul's Presbyterian, evening.

Canon Beaudin will preach both morning and evening at Christ Church cathedral. The services are holy communion, 8 a. m.; matins, 11 a. m., and evensong, 7 p. m. The order of the musical services is:

**MATINS.**  
Voluntary—Daybreak ..... Sydney Gault (As Set 20th day) ..... 208  
Psalm (As Set 20th day) ..... 208  
Te Deum (Alternative 1st Set) ..... 208  
Benedictus (Rev. Rowe) ..... 208  
Hymns, 228, 198, 208 ..... A. and M.  
Kyrie ..... 208  
Gloria (Tid.) ..... 208  
Voluntary—Grand Chorale in G ..... 208

**EVENSONG.**  
Voluntary—Elevation in E ..... Wey Professional Hymn, 297 ..... A. and M.  
Psalm (As Set 31st day) ..... 311  
Te Deum (Alternative 2nd Set) ..... 311  
Benedictus (Rev. Rowe) ..... 311  
Hymns, 228, 198, 208 ..... A. and M.  
Kyrie ..... 311  
Gloria (Tid.) ..... 311  
Voluntary—Fandango in F ..... 311

There will be morning prayer at 11 and evensong at 7, at St. John's, the sector. Rev. Percival J. Smith, the preacher at both services. The musical arrangements are as follows:

**MORNING.**  
Organ—Overture to the Oratorio Saul ..... Handel  
Hymns ..... 208  
Organ—March of Priests ..... Mendelssohn

**EVENING.**  
Organ—Most Beautiful Appearance ..... Haydn  
Hymns ..... 370, 270, 306  
Organ—Postlude in G ..... 306

Rev. E. G. Miller will preach morning and evening at St. Barnabas, the order of the services being:

**MATINS 11 A. M.**  
Venite and Psalm ..... Chants as Set  
Te Deum ..... 208  
Benedictus ..... 208  
Hymns 228, 198, 208 ..... A. and M.  
EVENSONG 7 P. M.  
Psalm ..... Chants as Set  
Te Deum ..... 208  
Benedictus ..... 208  
Hymns 147, 500, 311 ..... A. and M.  
At St. James, the order of the services will be holy communion at 8 a. m., matins, litany and sermon on "Kindness to Animals" at 11, and evensong and sermon on "I Am the Life" at 7 p. m. The services at St. James's, Victoria West, are holy communion at 8 a. m., service at 11 a. m. and 7 p. m.

At the Reformed Episcopal, Rev. Dr. Leslie Clay, minister, there will be public worship at 11 a. m. and 7 p. m.; Sabbath school at 2.30, and Bible class at 3 p. m. The music follows:

**MORNING.**  
Organ—Andante ..... Wey  
Hymns ..... 115  
Anthem—Sing of Heaven ..... 115  
Hymns ..... 196, 267, 287  
Organ—Allegro ..... 287

**EVENING.**  
Organ—Melody ..... West  
Psalm ..... 62  
Anthem—The Radiant Morn Hath Passed ..... 62  
Quartet—One Sweetly Sober Thought ..... Ambrose  
Hymns ..... 479, 506  
Song—Just As I Am ..... Danks  
Organ—Postlude ..... Petrall

The Rev. Mr. Hastings of Emmanuel Baptist church, will preach in the morning at St. Paul's, Victoria West, and in the evening the theme will be: "The Work of the S. P. C. A. and Our Duty to the Animal Creation." Mr. Tait will conduct the evening service. The pupils of the Sabbath school will attend this morning's service at the First Presbyterian church with their parents, for the annual Sabbath school service. In the evening the subject will be, "The Freedom of Salvation." There will be Sabbath school at 2.30; Junior Endeavor at 4 a. m. and Senior Endeavor at 8 p. m.

This is Library Sunday at the Centennial Methodist church and friends of the school are requested to take a book to add to the library shelves. In the morning the pastor, Rev. W. H. Barradough, will take for his subject, "God and the Sparrow" and in the evening he will preach on "The Narrow Escape." There will be an open session of the Sunday school in the afternoon to be addressed by Rev. S. S. Ousterhout, Ph.D., and Col. Reed. The pastor, Rev. Elbert S. Rowe, will preach morning and evening at the Metropolitan church, his

Truth Students meet in the Williams block, Broad street, at 7 p. m.

## THE TOTEM POLE.

Legends and Traditions of Alaska Indians—Tales of Totem Poles.

The following is an extract from a pamphlet published by P. Landberg, 42 Johnson street, in connection with his free museum of Indian curios:

"There are, or were, four large and important tribes in Alaska, the names of which, in the Tsimshian language, are Kish-poot-vadda, by far the most numerous; hereabouts have for symbols, the fishback whale in the sea, the grizzly bear on land, the grouse in the air and the sun and stars. The next clan, known as the Canada, have for symbols the frog, the raven, the star fish and the halibut. The Lachbees, another clan, had the heron and the grizzly bear for totems. Lachsheek, the eagle, the heaver and the halibut.

"These creatures, however, are only regarded as the visible representatives of the powerful and mystical beings or spirits of Indian mythology, and as all of our group are said to be of the same kindred, so all the members of the same clan, whose hereditary symbols are the same, are counted as blood relations, and, strange to say, this relationship holds good should the persons belong to different or even hostile tribes or speak a different language, or be located thousands of miles apart, and this relationship is perpetuated in the face of oblitterating circumstances. The Indians point back to a remote age when their ancestors lived in a hazy land, and where, in a mysterious manner, the mythical creatures, whose symbols they retain, revealed themselves to the heads of the families of that day.

"They relate the traditional story of an overwhelming flood which came and submerged the great land, and spread death and destruction all around. Those of the ancients who escaped in canoes were drifted about and scattered in every direction on the face of the waters, and where they found themselves after the flood subsided there they located and studied out their pre-emption claims and formed new tribal associations."

## SUPREME COURT

CIVIL SIDE

List of Cases Set Down for  
Trial on Tuesday July  
2nd.

The judges of the Supreme court are all in Vancouver, where a sitting of the Appellate court is being held, and consequently there was no business in Chambers yesterday. Monday, being Dominion Day, is a legal holiday, and the courts and offices will be closed.

On Tuesday the Supreme court will sit for the trial of civil cases; Mr. Justice Irving will, probably, preside. Following is a list of the cases set down for trial:

Harris v. Dunsmuir—To be tried before a jury. J. H. Lawson for plaintiff; F. Peters for defendant. Stands over till next session by consent.

Watson v. Grant—J. H. Lawson for plaintiff; C. E. Pooley for defendant.

Ontario Bank v. Macanlay Bros.—J. H. Lawson for plaintiff; R. Cassidy for defendant.

Currie et al v. R. Ward & Co.—J. H. Lawson for plaintiff; F. Peters for defendant.

Boggs v. Bennett Lake & Klondike Navigation Co.—J. H. Lawson for plaintiff; F. Peters for defendant. Judgment by consent for plaintiffs without costs.

Warren v. Genelle—J. H. Lawson for plaintiff; W. A. Gilmour for defendant.

Obell & Morris v. Bennett Lake & Klondike Navigation Co.—J. H. Lawson for plaintiff; W. A. Gilmour for defendant.

Victoria City v. Bowes—C. D. Mason for plaintiff; A. Martin for defendant.

Victoria City v. Balos—C. D. Mason for plaintiff; F. B. Gregory for defendant.

Bryce v. Jenkins et al—C. D. Mason for plaintiff; F. B. Gregory for defendant.

Levell v. Brackman et al—Thornton Fell for plaintiff; H. B. W. Alkema for defendant. Postponed till after long vacation.

Fishermen's Canning Co. v. Wang On—G. Hunter for plaintiff; J. P. Wells for defendant.

Eckstein v. Hinton—J. P. Wells for plaintiff; George Jay for defendant.

Hazerty v. Lemons—Mount Sicker Mining Co.—C. E. Pooley for plaintiff; J. H. Lawson for defendant.

Urguhart v. Urguhart—A. C. Anderson for plaintiff; S. P. Mills for defendant.

Schl v. Tugwell—A. L. Belyon for plaintiff; F. B. Gregory for defendant.

Sanders v. Hunsell—J. H. Lawson for plaintiff; H. B. Robertson for defendant.

Clarke v. Cummings et al—Gilmour for plaintiff; Hunter for defendant.

Four bands at Ladysmith on Dominion Day, July 1. Trains leave E. & N. depot 9 a. m. and 1.30 p. m.

From Montreal Witness.

Sooner or later the Canadian government will take over the control and management of the telegraph business of the country.

The telegraph, including the telephone, is obviously merely a branch of the system of the public communication of which the post office has hitherto been, and will for some time to come, be the main trunk line.

The post, once in private hands, is now managed by governments in all countries where it is established, and the auxiliary systems which have been established later will inevitably follow the earlier system by passing under government control.

This was foreseen when the Dominion Telegraph act was passed, as it provides carefully for the transfer of all systems established under it to the government when that course is determined upon by parliament.

The government of the United Kingdom has for a long time managed the telegraph system as a part of the post office department and in all other self-governing nations of the empire—Australia, New Zealand, and South Africa—the example of the Mother Country has been followed.

Newfoundland has taken back the control of her telegraphs, and the government of India controls the very extensive telegraph system of that country.

Canada is about the only considerable country of the empire in which the telegraphs are still owned and controlled by corporate bodies, receiving no more than a license from the government to use the lines.

Canadians when called upon to consider the question seriously will come to the conclusion that somehow or other their country has in this matter lagged behind the rest of the empire, and will undoubtedly decide to take the same course as those as soon as convenient take over the control of this public service.

What will appear a very strong argument in favor of the immediate resumption of the business by the government has been brought forward by the fact that the "All British Pacific cable" is almost certain to develop along the lines laid down by Sir Sandford Fleming into a government owned cable system, uniting all British possessions in the empire in a single system of telegraphs, and to that end for completing things they have begun.

Canada would probably have long ago owned its telegraph systems had it not been for the example and influence of her next great neighbor, the United States, which, until recently, was owing to its proximity, more plainly in view and more powerful than those of our sister nations.

The Canadian telegraph system has been a hindrance to the United States, and the joint working of the lines of the two systems has been of great benefit to the Canadian telegraph system.

But Canada is now looking not merely toward Great Britain, but more toward the rest of the empire, and the rest of the world, and perhaps less exclusively towards the United States as the direction of her development.

The time has come when government control can be established with benefit to the Canadian telegraph communication with the empire and the world, without at all impairing our communication with the United States, if the American companies that are, in their attitude regarding the maintenance of the present international system of working under the transfer of control of Canadian lines to the government.

The United States government will also take over the telegraph system of that country, and the maintenance of the present international system of working under the transfer of control of Canadian lines to the government.

The cable and land telegraphs form united systems of that country, and the maintenance of the present international system of working under the transfer of control of Canadian lines to the government.

Corporations are influential and powerful, and will successfully oppose government ownership for some time to come.

INTERNATIONAL CRICKET.

Canadians Lose First Match With the Quakers.

Philadelphia, June 29.—The Canadian cricketers' team lost its first game of the series here today, with the Belmont cricket club, after a most sensational finish, by seven wickets. Until the last two hours' play of the day had commenced, the game looked to be a certain draw. But the remarkable bowling of T. B. Kneale made it possible for the Quakers to win out 15 minutes before time was called.

Continuing this morning, the Philadelphians carried a total of 131 to 178 before the side was dismissed, the home team being bowled out in the last hour of the match.

The Canadians started on their second venture, and the first six men made a showing equal to their first innings. C. Lowmshore being the principal contributor, with a well-placed 56.

Great Britain, more toward the rest of the empire, and the rest of the world, and perhaps less exclusively towards the United States as the direction of her development.

The time has come when government control can be established with benefit to the Canadian telegraph communication with the empire and the world, without at all impairing our communication with the United States, if the American companies that are, in their attitude regarding the maintenance of the present international system of working under the transfer of control of Canadian lines to the government.

Results Of  
Cricket MatchesAgain the Collegiate Team Is Too  
Strong For Boy's High  
School.Fifth Regiment Goes Down Be-  
fore the Practice of Royal  
Artillery.

Yesterday morning the Collegiate school Cricket Club defeated the High school eleven by five wickets. The match was played at Beacon Hill, and the scores in the first innings were very even, but in the second innings the necessary runs in the second innings for the loss of half their wickets. The High school batted first and made 20 runs. Then the Collegiate boys went in, and it looked as if they would have even worse than their opponents. Nine wickets were down for only 15 runs, but Kay and Dart made an obstinate stand, scoring five runs each and when Kay was finally stumped the total was 23. In their second innings, the High school boys made 22 runs, but the Collegiate school with 18 runs to make to win. They accomplished, but not without some trouble, for Cameron and Houston made great efforts to pull the match out of the fire, and at one time it looked as if they might succeed. The scores were as follows:

YESTERDAY'S FIRST INNINGS.

Robertson, b. Janion, 0.

McIntosh, run out, 0.

Levy, b. Janion, 0.

Houston, b. Janion, 0.

Cameron, b. Janion, 0.

Albert, b. Janion, 0.

H. Marshall, b. Janion,

## HOME NURSING SOCIETY.

An Invalid Chair a Pressing Need of the Society at Present.

An invalid chair is much wanted by this society for the occasional use of those under its care, who, either temporarily or permanently are laid aside by illness or infirmity. Should anyone possessing this great comfort to the helpless feel disposed to give it to this society for the purposes mentioned above, they are requested to write to the president, Mrs. Galletly, Hochelaga, Rockland avenue. The well known fact that this society is forbidden by its rules to nurse any but those who are too poor to pay for other attendance and are usually so circumstanced as to be unable to leave their homes, will suggest to those who know anything of such cases, how greatly an hour in the open air is enjoyed, provided it can be obtained without fatigue, and how beneficial physically and mentally it often proves.

The Finest made—Martell's Three Star Brandy.

A woman who is weak, nervous and sleepless, and who has cold hands and feet, can not feel and act like a well person. Carter's Pills equalize the circulation, remove nervousness, and give strength and rest.

### THE WEATHER.

Meteorological Office, Victoria, June 29-30 p. m. **SYNOPSIS.** The barometer is abnormally low from Cariboo eastward to Lake Superior and in California, while off the Washington coast it is high. These conditions will probably cause the weather along the coast and fresh winds over the Straits of Juan de Fuca. Rain has fallen in Kootenay and is now spreading across the territories towards Manitoba. The temperature in Eastern California and Utah reached 100 today.

#### TEMPERATURE.

## Argonauts Of the North

Four Years Wanderings in the Inhospitable Sub-Arctic Wilderness.

Search for Gold That Ended in a Successful Fur Hunt.

Among the Islander's passengers from the North was George Woolley, of Edmonton, Alberta, a former member of the North West Mounted Police and a veteran of the Northwest rebellion of 1885. Mr. Woolley's adventures and the vicissitudes of his wanderings during the past four years would make an interesting and bulky volume.

He left Edmonton in August, 1897, as one of a party of five, with the intention of proceeding to the Yukon by way of the Mackenzie river to Fort Good Hope, then crossing the divide by the most feasible route and prospecting the streams as they went. The first winter was spent at Great Slave lake, where the party put in their time fishing and hunting. The following spring they continued down the Mackenzie to Fort Good Hope and struck out from there making the best of their way by land and water towards their destination. Their wanderings were beset by dangers and hardships so great that Mr. Woolley, in speaking of his experiences, said and hardened Nor'Wester as he is, concentrated his memory of them in the expression, "God, it was a hard trip!"

The party separated at Great Slave lake. Woolley and F. H. Braine determined to cross the mountains west of the Arctic Circle. After prospecting those streams, without finding anything, they returned to Good Hope and waited for the freeze-up, meantime fishing and hunting for their winter's dog feed. As soon as the ice was firm they started again and built a cabin on Big Pine and then made several trips back and forth, bringing up their outfit. Finally, with the help of some Indians, they got everything to the Red river. They ascended the stream and made a long portage across the country to the head waters of the Peel river, on which they put in some time prospecting without success. The country traversed was all tuck and moss, and very often they found it difficult to gather enough wood to boil their food. As there were no trees, they placed their camp upon a large lake, called by the Indians Latstine, on the top of a mountain, a remarkable freak of nature. From the Peel they made across to the Stewart river, where they hunted and trapped most of the winter. It was cruelly cold, the mercury going as low as 68 at times, and they had only a single blanket each and no tent—having had to leave everything behind on account of their dogs giving out.

They were fortunate enough while at Good Hope to get a copy of the country drawn by a French missionary priest, and published in Paris, which Mr. Woolley says is the best map of that country that he has seen. Without it they would have had even more difficulty in getting through, in fact, they regarded it as their salvation. During all their wanderings, when starvation and death threatened them, at the critical moment something turned up to relieve or mitigate their sufferings. The Indians they met treated them with great kindness and hospitality and assisted them in every way possible.

Finally, after many weary months, spent in a vain search for gold, they made a permanent camp on Lansing creek, a tributary of the Stewart and devoted themselves to hunting and trapping. In this venture they were tolerably successful. Mr. Woolley tired of the life and left his old partners this spring to return to his home at Edmonton. He arrived in Victoria with a fine lot of furs, which he proposes to dispose of here and then proceed east.

Mr. Woolley reports the general condition of the Yukon as very promising, but he says wages will be low on the creeks during the coming winter, judging from the number of men he has just going down river. The Stewart river has been pretty thoroughly prospected and colors of gold are found everywhere, promising for hydraulic, but useless to the ordinary sluice miner. He is strongly of the opinion, however, that a big strike of coarse gold will be made soon on the south branch of the Stewart, where the formation is much more promising than on the main river. He and his companions are well pleased to be back in civilization and will spend a brief holiday in Victoria before going east.

## "Dardanelles"

Is a pure Egyptian Cigarette. "Its quality tells the tale." Try a box—no smoker ever stings at a box. For sale everywhere. Fifteen (15) cents per box.

## JOSHUA DAVIES AUCTIONEER

### Mortgagee's Sale

OF

IMPROVED CORMORANT ST.

### Real Estate

ON  
Wednesday, July 3rd, 1901  
at 12 o'clock, noon.

AT  
The Board of Trade Building

I have received instructions to sell by

Under power contained in a certain Mortgage Deed, No. 5727R, and dated the 25th day of September, 1886, registered two days later in Charge Book, Vol. 7, Fol. 71.

All that certain piece or parcel of land situate in the City of Victoria, Vancouver Island, and known on the Official Map as lot numbered

- 434 -

located on the north side of Cormorant St., near Stone St., together with all the improvements thereon, consisting of a two-story brick store, now rented to Chinese tenants.

Intending purchasers may view the deeds at the office of Messrs. Bodwell & Duff, Solicitors.

TERMS AND CONDITIONS, together with plan will be issued on Monday, June 21st.

JOSHUA DAVIES, Auctioneer.

## JOSHUA DAVIES AUCTIONEER

Under instructions from the Hon. W.C. Wells, Chief Commissioner of Lands and Works, I will sell by public auction

### AT PRINCETON

Wednesday, July 17, 1901  
at 11 o'clock, a. m.

THE GOVERNMENT TOWNSITE  
OF

## Tulameen

Located at OTTER FLATS at the FORKS OF TULAMEEN RIVER and OTTER CREEK at the south end of OTTER VALLEY, in the centre of the great mining district of

### SIMILKAMEEN

whose coal measures have been traced from north of "TULAMEEN" Townsite, across and extending to the south branch of the SIMILKAMEEN river. "TULAMEEN" being located in the CENTRE OF THE COAL AREAS, which are being vigorously prospected, under licenses issued by the Lands and Works Department.

HYDRAULIC AND PLACER MINES are being worked on Granite and Slate Creeks and LODGE MINING is attracting much attention from the rich ore found on KELLY, EAGLE, OTTER and BOULDER CREEKS and upon the TULAMEEN RIVER.

At ASPEN GROVE, on Otter Creek, about twenty miles north of "TULAMEEN," The Big Sioux Grant and Portland Claims with numerous others, are credited with large ore bodies.

In Otter Valley are to be found some good farms and hay lands, those under cultivation raising good crops.

The GOVERNMENT WAGON ROAD from NICOLA runs through TULAMEEN, Princeton, Allison, and is the main wagon road over SIMILKAMEEN, Okanagan and Boundary district.

### RAILWAYS

The Vancouver and Grand Forks Railway, incorporated 1901. See Bill No. 72.

From Vancouver to New Westminster, following the south bank of the Fraser river to Chilliwack to Hope; following the Coquella and Coldwater rivers, thence the Otter river to its junction with the TULAMEEN RIVER, where the TOWNSITE OF TULAMEEN is located, thence to Princeton, Osoyoos Lake, Midway and Grand Forks, with branches, etc.

The C.P.R. have a line located through Allison to Spence's Bridge.

### All Lots OFFERED

By the Auctioneer will be sold without reserve. CROWN GRANTS at purchaser's expense.

Terms One-Third Cash, One-Third 3 months, One-Third 6 months.

Plans, with full particulars, will be issued next week.

JOSHUA DAVIES,  
Auctioneer.

## JOSHUA DAVIES AUCTIONEER.

Under instructions from William Monclith, Esq., "Committee of the Estate of Charles S. Bird," I will sell by Public Auction on the premises known as the west half of sections 10 and 11, range 2, South Saanich, located on the west side of Steller's crossroads, near Wrigley's farm, on

Saturday 6th, July 1901

12 O'Clock, Noon.

2 cows, 5 yearlings, 2 calves, 5 h. ss. 2 sows, 23 pigs, 100 chickens, 2 plovers, 1 iron harrow, 1 Disc harrow, tools, steel yards, etc.

Terms cash.

JOSHUA DAVIES,  
Auctioneer.

### Growing Crops

25 acres oats and peas, 25 acres hay, 1 acre fruits.

The free use of the premises will be given the purchasers of the crops until the 31st October, 1901.

Terms cash.

JOSHUA DAVIES,  
Auctioneer.

## W.T. HARDAKER THE AUCTIONEER

Under instructions I will sell by

AUCTION

At Sale Rooms, 77, 79 and 81 Douglas St.,

FRIDAY, JULY 5th, 2 P.M.

### DESIRABLE FURNITURE And Effects

Particulars later.

WM. T. HARDAKER, Auctioneer.

### NOTICE.

#### The Gem Restaurant

Broad Street, opposite the Colonist. Has been purchased by the Rogers' Sisters, who intend to thoroughly rest and renovate the premises, and make the Gem Restaurant equal to the best in the land. Nothing but WHITE LABOUR will be employed, and the patrons of this hostelry may depend on having nothing but the best of everything dished up by white labor. Meals from 15 cents up.

## BETTER THAN EVER

## Ogilvie's Hungarian and Glenora Patent

ARE DISTINCTIVE BRANDS OF FLOUR, HAVING NO EQUAL

The public are warned against substitutes and other Manitoba Flour represented as good as Ogilvie's.

Ogilvie's Hungarian is the best Flour in the World and has no equal.

DAILY CAPACITY OF MILLS, 7500 BARRELS

### Tenders Wanted

For clearing twenty-five lots at Lady-smith. For particulars apply Wm. Munzie at the Office of the Shawinigan Lake Lumber Co. Discovery Street.

### NEW JAPANESE FANCY GOODS

Arrived at ORIENTAL BAZAAR, 90 Douglas St., and at YOKAHAMA BAZAAR, 152 Government St., near Victoria Hotel.

### GENUINE BARGAINS

A FINE ASSORTMENT OF LADIES' MANICURE SETS CURLING IRON SETS LADIES' AND GENTS' PURSES.

To be sold at prices—well call in and satisfy yourselves. As we are going out of this line they must be cleared. They are of finest quality.

THE B. C. DRUG STORE.

J. TEAGUE, Jr., Mgr., 27 Johnson St. Phone 356.

# Havana Cigars

We have for many years imported direct from Havana all the leading brands of Cigars, and have this year entered more extensively into this particular branch of business than ever before. Having made connections with the leading manufacturers of Cigars in Cuba it enables us to have selections made especially for our trade of all the leaders in that line. We take pleasure in mentioning here some of the brands we carry:

Henry Clay

La Africana

A de Villar y Villar

Genaro Velasco

Carolinas

H. Upmann

El Ecuador

La Espanola

Benjamin Franklin

Robert Fulton

La Palma de Cuba

Flor de J. S. Murias

Bock & Co.

La Gerona

We have an immense stock of the above and other popular brands in all sizes.

## DOMESTIC CIGARS

A large stock to select from, all of good quality, including the famous "IRVING," and "GEORGE W. CHILDS" Cigar.

Our Prices Are Right

## PITHER & LEISER

Importers and Wholesalers  
Victoria, B.C.

# MOET & CHANDON

Dry Imperial  
Vintages: 1889, 1893.

This is the Favorite Wine in all The Great London Restaurants and Hotels.

## TURNER, BEETON & CO.

# British Columbia's Mining Industry

**Substantial Increases Shown in Nearly Every Class of Mining. Total Value of Output for 1900 \$16,344,751. An Increase of \$3,951,620, or 32 per cent. Over 1899. Phenomenal Increases in Lead, Copper, Gold and Coke.**

The annual report of the minister of mines, for the year ending December 31, 1900, has just been published. The report covers 300 quarto pages, illustrated with 41 half-tone pictures, and accompanied by two maps; one of the province showing mining divisions, and the other of portions of Atlin, Bennett and Chilikot mining divisions.

The system followed in computing the output of the mine is as follows: The output of a mine for the year is considered that amount of ore for which the smelter or mill returns have been received during the year. This does not give the exact output of the mine for the year, but rather the amounts credited to the mine on the company's books during the year. This plan, however, has been found very approximate for each year, and ultimately correct, as ore not credited to one year is included in the next.

In calculating the value of the products, the average price for the year in the New York metal market has been used as a basis. For silver 55 per cent, and for lead 90 per cent, of such market

Other materials in 1900 shows a 22 per cent. increase over 1899, and 66 per cent. increase over 1898.

Total output in 1900 shows a 32 per cent. increase over 1899, and 59 per cent. increase over 1898.

These figures speak so eloquently of the growth of the industry that further comment seems scarcely necessary.

**LEAD MINING.**  
In 1891 the total value of the output from the lead mines of the province was \$781,342, in which year we may be said to have had our beginning as a mining community. We had then practically an unproven country, no railways ran through the mining districts, and there were no facilities for the treatment of ores.

In 1895 the value of the output of our lead mines had grown to \$2,342,397, and it has increased year by year, reaching the sum of \$6,751,604 in 1899, while in 1900 it amounts to \$10,000,751, an increase over last year of \$3,318,153, and equivalent to a gain of 49 per cent. The increase of this year is certainly a subject for

which caused such a demand for labor at good wages that the placer claims were neglected.

## HYDRAULICS.

Hydraulic plants in British Columbia are now just beginning to be productive and next year we may expect to see a considerable output from the Cariboo, Omineca, and Atlin districts.

On the west coast of Vancouver Island, a number of hydraulic leases have been taken out for heavy deposits of black sand carrying gold. This branch of the hydraulic industry is new to the province, and this year (1900) yielded some \$12,000, or more than the cost of the installation of plants, so that next year good returns may be expected.

## DREDGING.

Dredging in British Columbia has, so far, been a failure, but many companies have tried it and are still trying it, confident of ultimate success.

The river bottoms carry gold in quantities greater than many of the successfully worked deposits of New Zealand

in British Columbia, so much so that over 90 per cent. of our silver production for 1900 is derived from silver-lead ores.

The total amount of silver produced this year was 3,958,175 ounces, worth \$2,309,200, an increase in value over 1899 of \$645,492, or equivalent to 39 per cent.

This increase has been chiefly caused by the output of South East Kootenay, which this year has produced 900,411 ounces of silver as against 33,516 ounces in 1899.

The Socon has made an increased production of 230,151 ounces, largely accounted for by the increased tonnage of the district.

The silver derived from copper-silver ores has been increased by the output of the "Boundary" district and the increased output of the coast districts, but has been diminished by the temporary shutting down of the Hall Mines, in the Nelson district, and the lesser silver values found in the ores of the Rossland camp, Trail creek district.

## LEAD.

The most notable feature of the year's development has been the increase in the production of lead. The output for 1900 amounts to 43,588,621 lbs., valued at \$2,631,887. This is an increase over the previous year of \$1,813,017, equivalent to 206 per cent.

This increase has been brought about chiefly by the energetic development of two or three mines in Port Steele division, although all the lead-producing districts, except Ainsworth, have shown a material increase in production.

The Socon mining division has heretofore always held first place in the list of our lead producers, having an output in 1897 of almost 31,000,000 lbs., and although in 1899 it fell as low as 16,600,910 lbs., it has again increased in 1900 to 19,565,743 lbs., a gain over the previous year of about 17 per cent.

However, the increase in Port Steele division of from 881,167 lbs. in 1899 to 38,455,070 in 1900 has earned for it the right to be considered the lead-producing centre of the province.

## COPPER.

The fine copper produced in 1900 was 9,977,080 lbs., worth \$1,615,280, an increase in value of 19.5 per cent. over the previous year.

More than half of this (5,672,177 lbs.) was produced from Boundary Creek ores, that district entering the field as a copper producer for the first time, while the output of the coast mines has more than doubled, being for the year 2,133,902 lbs., a production second only to that of the Boundary district.

Rossland shows this year a copper production less than half that of the previous year, despite an increased tonnage of about 25 per cent. The copper contents of these ores in 1899 was 33 lbs. to the ton of ore, while in 1900 it was only about 10 lbs. to the ton.

The output of the Nelson district this year shows a considerable decrease, but this is owing to the largest producer of the district having temporarily suspended shipments pending the installation of new machinery and development of the mine.

## IRON ORE.

Iron ore is as yet only mined in this province as a flux for lead smelting, and the copper and other ores carrying an excess of iron, which have now been discovered, are rapidly replacing this barren flux, with the result that the tonnage of iron ore mined is decreasing, and this year amounts to only 750 tons.

## OTHER MINERALS.

There is no record this year of any production of platinum, but the metal is reported as having been found in the neighborhood of Desse Lake, in the extreme northern part of the province, as well as on the Thompson river.

The production of building materials,

promising, and the summer will prove what are the values existing.

In the neighborhood of Desse Lake, Liard mining division, the outlook for successful hydraulic operations is good, and the coming year will see at least one company in operation there.

In the Cariboo district the work of the year has been chiefly development—installation of hydraulic plants, of which several are in course of construction—greatly stimulated by the successful season of the pioneer company, the Cariboo Hydraulic.

In the Lillooet district several properties have been developed, showing quartz carrying gold—free and associated with iron sulphides. Five thousand seven hundred and thirteen tons of these ores have been crushed and have yielded very satisfactory results, and confidence is expressed in the future of this section.

## COAL.

As among the developments of the year may be mentioned two in new localities in the Crow's Nest coal fields. These have proved, by actual work, the results of the prospecting done previously, and have shown the fields to be very extensive and the coal of good quality, suitable for making a first class coke.

In the Nicola valley coal fields there has been a good deal of development work done this year, with results which are reported as highly satisfactory. A number of new finds have been made in the same locality, but as yet no shipments have been made.

In Southern Cassiar, in the neighborhood of the Babine river, a number of coal locations have been made this year, and a large number of licenses to prospect taken out. Little development has been done to prove the ultimate

been developed sufficiently to prove the existence of large bodies of copper ore containing low gold and silver values. Some preliminary shipments of the ore have been made, on which the smelter returns showed 10 per cent. copper.

On the West Coast of Vancouver Island new discoveries of copper have been made and some small amount of development work done, but not sufficient to prove the values of these properties.

On Texada Island—notwithstanding the financial difficulties of the principal company—the copper mines have more than held their own.

Throughout the Boundary country other copper-gold properties have continued to be developed, notably the Mother Lode at Greenwood, which, this coming year, together with certain claims in the Phoenix camp, will be a further factor in our copper production.

In the Similkameen three or four copper properties are reported as showing up well, but as yet transportation facilities are lacking, and serious operations will be delayed until the advent of the railway, which is expected within a year or so.

**IRON DEPOSITS.**  
There has been considerable excitement on the coast over deposits of magnetic iron ore, chiefly in the neighborhood of Alberni canal. These deposits have been known for some time and were inspected by the Provincial Mineralogist in June. They were found to consist of extensive surface showings of very good magnetic iron ore. The development work consisted largely of surface stripping, and while the surface indications were excellent, the depth or permanence of the deposits had not been proved by any shaft or sufficient tunnel.

Before iron ore will attain any value on this coast it must be proved to exist

These "notes" of the prospects have, however, to pass through the hands of promoters who, too often, not content with a regular commission, raise the "notes," or add on such a premium that a small percentage of the original loan is available for the development of the prospect.

A prospect which gets, say \$10,000, might pay back such loan doubled or trebled; but why should it be saddled with a debt of \$10,000,000 and expected to pay this back with interest? Is it any wonder that a prospect like this becomes a failure?

What should mining investment not be entered into as would any commercial business—only after serious investigation?

If the investing public—the real lenders of money to the prospects—would exercise ordinary business caution and see to it that the money for the stock they buy is used as it should be—on work, and not to fatten the promoter—there would be more successful working mines in the province today.

## ASSAY OFFICE.

The following is a summary of the work of the assay office, as reported by the provincial assayer.

During the past year 860 assays and a large number of determinations of mineral specimens were made, together with the usual amount of work for other departments of the government.

The fees collected amounted to \$1,407.

## NORTHERN GOLD.

The amount of gold dust from the north brought in the government assay offices for melting and assaying has shown a remarkable falling off, being this year less than half what it was last, amounting in value to only \$97,832

price has been taken. Treatment and other charges have not been deducted.

B. C. OUTPUT, 1900.	
Quantity.	Value.
Gold, placer, oz. 63,000	\$ 1,278,724
Gold, lode, oz. 107,153	3,453,581
Silver, oz. 3,068,175	2,309,200

Total.....	\$12,393,137	\$16,344,751

By districts the output in 1900 was:

Cariboo, \$84,227; Cassiar, \$467,479; East Kootenay, \$2,853,551; West Kootenay, \$35,649,940; Lillooet, \$88,493; Yale, \$1,422,465; Coast, \$4,896,153.

## PROGRESS OF MINING.

With regard to the progress of mining the report says:

It is with great satisfaction that we can this year again point to our statistics as proof of our rapidly increasing importance as a mining community.

Our total yearly output, while in itself not inconsiderable, is not as yet very large in comparison with that of some of the older mining countries, but it must be remembered that the mining in British Columbia is the growth of the last six or seven years.

It is not the amount of the present output so much as the wonderfully rapid growth of the mining industry indicated thereby, which causes the present satisfaction and confidence in the future.

As has previously been said in the reports of this department, our actual growth as a mining community must and will be measured by our actual output, as shown by reliable statistics, and it is such actual output alone that can give us, as a province, a standing among the mineral-producing countries of the world.

It is, therefore, best to let the statistics of the output actually made speak for themselves. The report points out that the total amount which the mining industry of the province has already, though but in its infancy, contributed to the wealth of the world, is \$152,155,208, which has been chiefly derived from—in order of importance—gold, \$75,297,263; coal and coke, \$49,140,917; silver, \$35,649,940; and lead, \$7,609,956.

The value of the mineral output of the province for the year 1900, the closing year of the century, amounts to \$16,344,751, as against an output of \$12,393,131 for 1899, an increase of \$3,951,620, and a proportionate growth for last year of nearly 32 per cent.

Placer gold in 1900 shows a 5 per cent. decrease from 1899, and 99 per cent. decrease over 1898.

Lode gold in 1900 shows a 21 per cent. increase over 1899, and 57 per cent. increase over 1898.

Combined gold in 1900 shows a 13½ per cent. increase over 1899, and 66 per cent. increase over 1898.

Silver in 1900 shows a 39 per cent. decrease from 1899, and 3 per cent. decrease over 1898.

Copper in 1900 shows a 19½ per cent. increase over 1899, and 85 per cent. increase over 1898.

Lead in 1900 shows a 206 per cent. increase over 1899, and 150 per cent. increase over 1898.

Coal in 1900 shows a 10 per cent. increase over 1899, and 27 per cent. increase over 1898.

Coke in 1900 shows a 148½ per cent. increase over 1899, and 143 per cent. increase over 1898.

## PLACER, WRECK BAY.

congratulation.

The number of producing mines has this past year also increased materially, for in 1899 the total number of mines was 43, while in 1900 some 60 mines shipped each over 100 tons, and 39 other mines shipped various quantities of less than 100 tons.

Of the mines producing in 1899, most of them still remain in the list for 1900, although a few have dropped out this year for one cause or another; but the greatly increased tonnage of ore mined, 93 per cent. greater than in 1899, is made up from the increased output of the other mines, an argument in favor of the persistency of the ore bodies.

The list of producers contains, however, a number of new mines that may be said to have graduated from prospects into producers, and the following table, which speaks for itself, shows the distribution of the mines and the men employed in 1900:

	Mines Shipping over 100 tons.	Mines Shipped less than 100 tons.	Men.
Cassiar.....	1	1	8
Atlin.....	1	1	8
East Kootenay.....	4	3	378
Port Steele.....	3	1	35
Other Divisions.....	3	1	35
West Kootenay.....	12	2	158
Ainsworth.....	10	8	703
Nelson.....	12	1	724
Sloam.....	9	9	1,000
Trail.....	6	2	38
All other Divisions.....	4	4	490
Lillooet District.....	5	3	221
Coast.....	5	3	221
Total.....	99	69	3,739

The coal mining industry of the province still continues to increase in importance, and has again, this year, broken all previous records with a total output of 1,594,224 tons, of which amount 1,594,224 tons were converted into coke, producing 85,140 tons and making a net production of coal of 1,430,245 tons. Of this production, 914,183 tons of coal and 51,757 tons of coke were exported.

The Vancouver Island collieries made a gross output of 1,383,376 tons of coal, of which 47,272 tons were used for coke-making, producing 19,244 tons of coke, and leaving a net production of coal of 1,336,023 tons. Of this product, 906,215 tons of coal and 12,739 tons of coke were exported.

The Crow's Nest Pass collieries made a gross output of 1,383,376 tons of coal, but half of it, or 691,688 tons, was used for coke-making, producing therefrom 65,915 tons, and leaving a net coal production of 1,035,734 tons. Of this production there was exported to the United States 7,068 tons of coal and 38,455 tons of coke.

As will be seen, the output of our collieries this year—coal and coke—has increased in value about 16 per cent. over last year's output, and there is every indication that another large increase will be made during the year 1901, especially in the output of the Crow's Nest Pass collieries, which are at present only being opened up, and which will have to supply at least two new smelters, besides a regular increase in consumption at the other ones.

## GOLD.

The gold production of the province for the year 1900, including both placer and lode gold, was worth \$4,732,145, an increase over 1899 of \$529,632.

This again "breaks the record" of gold production in British Columbia, and this year, as heretofore, does gold take first place in our tables of production.

The only decrease noted is in the production of placer gold, and this is due to the heavy falling off in the Atlin district. In 1899 the cream of the placer gold in that district was skimmed off from the shallower workings, leaving only the deeper workings, which will, generally speaking, require to be worked by hydraulic methods. The necessary hydraulic plants are being installed, but from the nature of things could not be expected to make any very serious output for the first year.

Disregarding the production of Atlin district during the past two years, the remainder of the province shows an increased placer gold output in 1900—compared with 1899—of \$283,824, due largely to the successful working of the hydraulic plants in the Cariboo district, notably that of the Cariboo Hydraulic Mining company, at Quesnel, which is practically the only plant of this sort in the province so far completed as to do systematic work, although several others ought to be in shape for the season of 1901.

The general placer output throughout the interior and northern part of the province has not been very large this past year (1900), owing to the high water in the early spring, and later to the destruction of the Yukon telegraph lines,

and elsewhere, but the conditions are different in this province, the gold being in very fine, flat flakes, hard to save, while the rivers are rapid and large boulders are frequent. It has yet to be demonstrated that a drifter has been found that will successfully overcome these difficulties, but the prize offered for so doing is great enough to induce repeated attempts.

## LODE GOLD.

The output of lode gold for the year 1900 amounted to \$3,533,381, being \$583,808 greater than the previous year, and equivalent to an increase of 21 per cent.

	Mines Shipping over 100 tons.	Mines Shipped less than 100 tons.	Men.
Cassiar.....	1	1	8
Atlin.....	1	1	8
East Kootenay.....	4	3	378
Port Steele.....	3	1	35
Other Divisions.....	3	1	35
West Kootenay.....	12	2	158
Ainsworth.....	10	8	703
Nelson.....	12	1	724
Sloam.....	9	9	1,000
Trail.....	6	2	38
All other Divisions.....	4	4	490
Lillooet District.....	5	3	221
Coast.....	5	3	221
Total.....	99	69	3,739

The coal mining industry of the province still continues to increase in importance, and has again, this year, broken all previous records with a total output of 1,594,224 tons, of which amount 1,594,224 tons were converted into coke, producing 85,140 tons and making a net production of coal of 1,430,245 tons. Of this production, 914,183 tons of coal and 51,757 tons of coke were exported.

The Vancouver Island collieries made a gross output of 1,383,376 tons of coal, of which 47,272 tons were used for coke-making, producing 19,244 tons of coke, and leaving a net production of coal of 1,336,023 tons. Of this product, 906,215 tons of coal and 12,739 tons of coke were exported.

The Crow's Nest Pass collieries made a gross output of 1,383,376 tons of coal, but half of it, or 691,688 tons, was used for coke-making, producing therefrom 65,915 tons, and leaving a net coal production of 1,035,734 tons. Of this production there was exported to the United States 7,068 tons of coal and 38,455 tons of coke.

As will be seen, the output of our collieries this year—coal and coke—has increased in value about 16 per cent. over last year's output, and there is every indication that another large increase will be made during the year 1901, especially in the output of the Crow's Nest Pass collieries, which are at present only being opened up, and which will have to supply at least two new smelters, besides a regular increase in consumption at the other ones.

## SILVER.

Silver and lead are very closely asso-

ciated in British Columbia, so much so that over 90 per cent. of our silver production for 1900 is derived from silver-lead ores.

The total amount of silver produced this year was 3,958,175 ounces, worth \$2,309,200, an increase in value over 1899 of \$645,492, or equivalent to 39 per cent.

This increase has been chiefly caused by the output of South East Kootenay, which this year has produced 900,411 ounces of silver as against 33,516 ounces in 1899.

The Socon has made an increased production of 230,151 ounces, largely accounted for by the increased tonnage of the district.

The silver derived from copper-silver ores has been increased by the output of the "Boundary" district and the increased output of the coast districts, but has been diminished by the temporary shutting down of the Hall Mines, in

# MINES AND MINING

By H. MORTIMER LAMB

## THE SITUATION.

The past week has been relatively uneventful. No change has apparently taken place in the situation at Northport, nor is the outlook in the silver-lead mining districts particularly bright. As a result of the Northport strike, all stopping and sorting at the Le Roi and Great Western mines has been suspended, and 150 men have been thrown out of employment. It is, however, certain that matters cannot remain as they are for any length of time, and development may therefore be shortly expected. If a settlement at Northport is not speedily arranged, it is to be feared that the strike may spread not only to Rossland, but to the Slocan district, which would be disastrous in the extreme at this juncture. But so far as production, we have already easily exceeded last year's copper and probably gold output, thanks not only to increased production from Rossland during the last three months, but also to the magnificent developments in Boundary and the regular shipments from Mount Sicker and the coast copper mines. If, however, the silver-lead returns of 1900 are equalled it is more than present indications promise, particularly if the report is true that the St. Eugene is to be entirely closed down until the lead market improves, which may not be for some time, though a substantial rise is anticipated in silver, which may help things somewhat. The Slocan output is estimated at 29 per cent. less than that of last year, despite increased contributions from the Slocan lake sections. On the other hand, good returns are expected from two or three of the larger hydraulic enterprises, excellent reports having already been received of progress in the Omineca, Cassiar and Cariboo districts. The Arctic Slope company expect to make a first clean up next month, and there are reasons to believe that the results will be exceedingly satisfactory, while the initial wash-up from Thibault creek is also likely to be encouraging, and the output from the Cariboo Consolidated will be at least as large as that of last year.

## DIVIDEND-PAYING MINES IN B. C.

The Nelson Tribune draws attention to the fact that considering the short time, but six years in which quartz mining has become a business in British Columbia, the number of dividend-paying mines is not by any means unimpressive when compared with older and certainly more important mining areas. Thus in Montana and Idaho and Utah and California, quartz mining has been carried on by incorporated companies for over 20 years. In Montana, 12 companies have paid dividends; in Idaho, but 2. In Utah, 20 companies have declared dividends, and in California 26. British Columbia, the youngest of all quartz mining countries, has 17 incorporated companies that have declared dividends. Here are the figures: Arlington, Sloan, paid a dividend in March, 1901 of \$20,000; the Boston, Sloan, \$12,500, in April, 1901; the Cariboo, McKinney, paid its last dividend in October, 1900, bringing the total thus far to \$18,000; the Central, Jones, paid, in April, 1901, \$175,000 in dividends; the Fern, Nelson, to January, 1901, \$10,000; the Idaho, Sloan, to January, 1901, \$202,000; the Last Chance, Sloan, to April, 1901, \$14,000; the Le Roi, Rossland, to November, 1900, \$1,205,000; the North Star, Kimberley, to June, 1901, \$108,000; the P. & N., Sloan, to Jan. 9, 1901, \$1,438,000; the Queen Be. S., Sloan, to July, 1900, \$25,000; the Ransford, Sloan, to January, 1901, \$287,500; the St. Eugene, Moyie, to April, 1901, \$210,000; the War Eagle, Rossland, to February, 1901, \$545,200; the Ymir, Ymir, to May, 1901, \$144,000; the Ymir, Ymir, to May, 1901, \$144,000; the Ymir, Ymir, to May, 1901, \$144,000. It is to be noted as a rather significant fact that out of these seventeen companies, only three have paid dividends under English management, and the amounts distributed by the other thirteen companies are unfavourably with those paid by the principal American and Canadian-operated mines.

## SATISFACTORY OUTLOOK FOR COPPER.

Dr. Ledoux, an eminent American metallurgist, and a partner in one of the largest refining establishments near New York, to which he has recently returned from the Greenwood Trail and Grand Forks smelters, is assigned, visited the copper mining districts of the interior last week, and according to an interview to the Spokesman-Review, on the subject of his investigations, which he has just completed, is of the opinion that the future of the copper industry in this country is a rather significant fact that out of these seventeen companies, only three have paid dividends under English management, and the amounts distributed by the other thirteen companies are unfavourably with those paid by the principal American and Canadian-operated mines.

The copper produced from the British Columbia ores finds a ready market in Europe, but the product of some other countries, because the ores are free from arsenic and other impurities which seriously affect the quality of the metal. The smelter is running full in all departments, and is turning out both lead and copper at a remarkably low cost, considering the complex character of the ore it handles and the necessity of using fluxes on Rossland ores. The copper product of the Boundary and Rossland districts alone amounts to more than 2,000,000 pounds of the metal per month, all being shipped at present in the form of matte. The output of the Boundary district, in November, the Granby smelter will be producing the metal itself, as additional furnaces and converters are being added. By that time they will be smelting over 1,000 tons daily. Speaking of his firm's direct interest in the Boundary district, Dr. Ledoux stated that they handled from 2,000,000 to 3,000,000 pounds of copper matte per month valued at a quarter of a million dollars.

## TWO MORE ASSESSABLE COMPANIES.

Two more local companies have this week followed the prevailing fashion of re-organizing on an assessable basis. At a meeting of the Brandon and Golden Crown company in Greenwood last week, reorganization was decided upon by the formation of a new company with the same capitalization, shareholders in the old company receiving instead of their present holdings, shares in the new company upon which an assessment of 5 cents will be levied. The other case is that of the Fairview Corporation, which, by the taking of the Fairview district in financial difficulties. It is, therefore, proposed to incorporate a new company under the title of the New Fairview Corporation, limited, capitalized in the same amount as the present concern, viz., \$1,000,000, the shares in the old company being exchanged for the new undertaking at the rate of 22 cents, leaving three cents a share to be called up in small monthly install-

ments. As the present corporation still has about 1,000,000 shares unissued in its treasury, the three cent assessment will be confined to only 300,000 shares issued, this will produce a fund of \$900,000 when the assessments are collected. Out of this sum it is proposed to pay off the Gooderham & Blackstock mortgage; to remodel and equip the tin horn mill up to a capacity of 60 stamps, and develop the mine sufficiently to furnish at least 150 tons of ore per day.

## WORK AT THE CARIBOO, McKINNEY.

The Cariboo mine at McKinney, from all accounts is in a very satisfactory position, the recent development work having exposed not less than seventy-five thousand tons of ore. It is therefore proposed to increase the mill capacity by an additional forty stamps, and a contract is also to be let for the sinking of a 4-compartment shaft and the installation of a hoist having a capacity of fifteen hundred feet.

## NELSON AND AINSWORTH DISTRICTS.

Reports from Ainsworth are to the effect that the Highland vein in the Stevens tunnel has now been cut for a distance of 37 feet and that the hanging wall has not yet been reached. The ore which has been passed through so far is all said to be good concentrating ore, but no values have been announced by the company. It is now said that the diamond drill borings gave an indicated width of 122 feet to the ledge. When the hanging wall is reached drifts will be started and each way on the ledge and room will be made for the employment of several more miners.

It is announced in London that the Athabasca mill will be shut down for two months in order to allow development work to be carried out. While the mill is closed down the tailings which have accumulated since the mill started will be treated. At the Referendum mine development work is proceeding under contract, while a five stamp mill and a small crushing plant is to be shortly installed.

## PROSPECTS IN THE LARDEAU.

A Revelstoke paper points out that to those in the Lardeau district who anticipated finding a "boom" this season before the railway actually reached the foot of the lake, the present comparative inactivity is somewhat of a disappointment. While, however, little fresh capital is at present finding its way into the district, the season being backward and the prospects of immediate railway building uncertain, though a force of two hundred men is now engaged at grading, a considerable amount of mine development work is in progress, a great deal of the better developed properties are preparing to ship. The owners of the Tribune propose to send 50 tons of ore shortly to Trail, the consignment of 80 tons last winter having netted nearly \$25,000, deducting freight and smelter charges, while at the Silver Cup an important new strike is reported in the 400-foot level. The London and British Columbia company has taken a bond on the Lexington property in the Lardeau, when two quartz veins from 10 to 16 feet in width have been located carrying gold running to about \$20 to the ton, and the Nettie L. Double Eagle, Black Warrior and other companies are making preparations to make the most of the season which has started late.

## EAST KOOTENAY.

The North Star continues to ship regularly at the date of about 1,000 tons monthly, though the output for the month of the year ending June 30 is not far short with an aggregate of nearly 170,000 tons of the total output during 1900. At the chief producing mines of the district, the Old Ironsides and Knoll Hill groups, the Mother Lode and the B. C. mining work continues to be progressing well and their output of ore is being well maintained. Work at the lower levels of the Winnipeg is proceeding as usual, and the management is encouraged to look for early developments that will fully warrant the consistent faith in the ultimate success of the mine that they are exhibiting in so unmistakable a manner. A crosscut tunnel is now being run and it is confidently anticipated that after its objective point shall have been reached the vein will be good news to tell shareholders.

## BOUNDARY CREEK MINES.

Nothing very new has occurred this week, though it is satisfactory to note that the production for the six months of the year ending June 30 is not far short with an aggregate of nearly 170,000 tons of the total output during 1900. At the chief producing mines of the district, the Old Ironsides and Knoll Hill groups, the Mother Lode and the B. C. mining work continues to be progressing well and their output of ore is being well maintained. Work at the lower levels of the Winnipeg is proceeding as usual, and the management is encouraged to look for early developments that will fully warrant the consistent faith in the ultimate success of the mine that they are exhibiting in so unmistakable a manner. A crosscut tunnel is now being run and it is confidently anticipated that after its objective point shall have been reached the vein will be good news to tell shareholders.

## THE HOMESTEAK, ROSSLAND.

Mr. S. W. Hall, superintendent of the Homestake mine at Rossland, has announced that shipments are shortly to be made from this property to the Trail smelter. Commenting on this the Trail Miner remarks: "This announcement will be of far more than ordinary interest to citizens of Rossland. Aside from the fact that the Homestake will add another property to the list of producing mines in this camp, the fact has a peculiar interest, inasmuch as the Homestake will be the first mine in Rossland's 'south belt' to ship ore regularly. Other 'south belt' properties have shipped small quantities of their product from time to time, but in no case has the product reached any appreciable quantity or been largely in swelling the camp's output. For this reason the announcement of the Homestake to the shipping stake marks something of an epoch in the history of the camp. For the past twenty months the management of the Homestake has proceeded with the programme of development marked out when the existing interests assumed control. A large amount of work has been accomplished during these months, and the affairs of the property have been administered in a manner that has won the confidence of the shareholders to such a degree that the task of getting in assessments has been carried through with comparative ease as compared with the difficulties encountered in this direction by other companies. The stockholders have sold their shares almost to a man, and despite the recent demand for the shares comparative small lots have been on the market. Now that the shareholders have in sight the consumption of the last 20 months' work it is safe to predict that the available supply

of Homestake stock will be still less. The company has excellent facilities for loading ore at the mine and with the extensive ore bodies blocked out in the mine the property will undoubtedly become a large and regular producer."

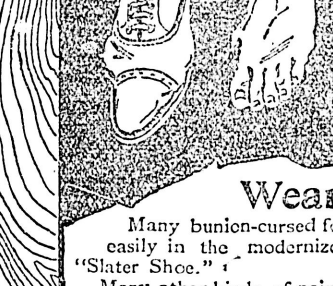

## THE LAST PICTURE.

Strange Story About Hubert Herkomer, the Artist.

In a London despatch to the Montreal Witness appears the following story: A peculiar story is attached to a picture already painted and in the possession of the King. This is Mr. Hubert Herkomer's water-color sketch of Queen Victoria, taken in the death chamber at Windsor the day after the Queen's death. Mr. Herkomer, or Von Herkomer, as he styled himself for the first time last year, is now one of the most successful artists in England. A good many years ago, however, affairs were very different with him. He had found London a "stony-hearted stepmother" and was about to abandon his art and his adopted city and travel with an entertainment company. The proprietors of the Weekly Graphic, however, rescued him and gave him work and a chance to make himself known. And after this Mr. Herkomer went straight ahead.

After many years he repaid the Graphic for its good services in an extraordinary manner. A picture of the Queen, as she lay dead, was of course one of the greatest scoops an English paper could have at that time. Reproductions of it would by this time have been hanging up wherever Englishmen make their homes. But to get such

a picture was beyond the hopes of all editors save one. The Graphic alone secured the coveted privilege of sending an artist to Windsor. Mr. Luke Fildes was first thought of, but he could not be reached at the moment, and of course there was no time to lose. The next choice fell upon Mr. Herkomer, who had done so much work for them, and for whom they had also done much. So Mr. Herkomer went down to Windsor and made his picture. But the Graphic and its readers have not yet seen the painting. Nor will they until the Royal Academy exhibition for 1901 is opened. Instead of receiving from their artist the picture which the commissioning him to paint, the proprietors of the Graphic got a telegram from him to the effect that the subject was "too sacred for publication." In spite of this, Mr. Herkomer had painted the picture and taken measures to secure its being widely seen, and noticed. Before leaving Windsor he saw the King and asked him to accept the drawing, as it was too sacred and pathetic, he was first thought of. Not thinking that he was abetting the artist in an act of ingratitude towards his employers, the King accepted the picture, and at the same time consented to its being exhibited in the forthcoming exhibition at Burlington House. Thus when the exhibition is opened in May, one of the pictures which must, on account of its subject, attract universal attention, will be a striking example of "man's ingratitude to man," whatever may be its value as a work of art.

**Do You Wear Bunions?**

Many bunion-cursed feet are to-day resting easily in the modernized, foot-conformed "Slater Shoe."

Many other kinds of painful, distorted feet find comfort in the "Slater Shoe."

—Because the "Slater Shoe" is made with the knowledge that most feet are painful and distorted. Special shapes of "Slater Shoes" for each kind of foot trouble.

You pay no more for comfort, wear and "Slater" appearance than you do for the common, foot-hurting kinds that may or may not be Goodyear welted.

Branded with name and price, in a slate frame, \$1.00 and \$1.50. "The Slater Shoe."

SOLE LOCAL AGENTS.

A picture was beyond the hopes of all editors save one. The Graphic alone secured the coveted privilege of sending an artist to Windsor. Mr. Luke Fildes was first thought of, but he could not be reached at the moment, and of course there was no time to lose. The next choice fell upon Mr. Herkomer, who had done so much work for them, and for whom they had also done much. So Mr. Herkomer went down to Windsor and made his picture. But the Graphic and its readers have not yet seen the painting. Nor will they until the Royal Academy exhibition for 1901 is opened. Instead of receiving from their artist the picture which the commissioning him to paint, the proprietors of the Graphic got a telegram from him to the effect that the subject was "too sacred for publication." In spite of this, Mr. Herkomer had painted the picture and taken measures to secure its being widely seen, and noticed. Before leaving Windsor he saw the King and asked him to accept the drawing, as it was too sacred and pathetic, he was first thought of. Not thinking that he was abetting the artist in an act of ingratitude towards his employers, the King accepted the picture, and at the same time consented to its being exhibited in the forthcoming exhibition at Burlington House. Thus when the exhibition is opened in May, one of the pictures which must, on account of its subject, attract universal attention, will be a striking example of "man's ingratitude to man," whatever may be its value as a work of art.

Mr. James Green, managing director of the Dominion Copper Company, has gone to Toronto, where early in July a meeting will be held to decide the location of the smelter. It is understood the company intends to shortly commence the construction of, meanwhile development work is actively proceeding upon the company's Brooklyn, Idaho and Rawhide mines, in Greenwood camp.

# COLDS

I regard my COLD CURE as more valuable than a life insurance policy. It not only cures colds in the head, colds in the lungs, colds in the bones, but it wards off dangerous diseases such as grippe, diphtheria, pneumonia, and consumption.—HUNYON.

Munyon's Rheumatism Cure seldom fails to relieve in one to three hours, and cures in a few days. Munyon's Dyspepsia Cure positively cures all forms of indigestion and stomach trouble. Munyon's Kidney Cure quickly cures pains in the back, loins or groins, and all forms of kidney disease. Munyon's Stomach Cure restores lost power to weak men. All the cures are 25 cents, at any drug store.

Munyon's Guide to Health should be in the hands of every mother. It will help them to know the symptoms of every disease and tell them the proper treatment. Sent free to any address. Munyon, New York and Philadelphia.

**HUNYON'S KIDNEY CURE CATABH.**

I regard my COLD CURE as more valuable than a life insurance policy. It not only cures colds in the head, colds in the lungs, colds in the bones, but it wards off dangerous diseases such as grippe, diphtheria, pneumonia, and consumption.—HUNYON.

Munyon's Rheumatism Cure seldom fails to relieve in one to three hours, and cures in a few days. Munyon's Dyspepsia Cure positively cures all forms of indigestion and stomach trouble. Munyon's Kidney Cure quickly cures pains in the back, loins or groins, and all forms of kidney disease. Munyon's Stomach Cure restores lost power to weak men. All the cures are 25 cents, at any drug store.

# Try PIONEER TOBACCO

Notice is hereby given that all the unappropriated Crown lands situated within the boundaries of the following areas are hereby reserved from pre-emption, sale, or other disposition, excepting under the provisions of the mining laws of the province, for two years from the date hereof, pursuant to the provisions of sub-section (5) of section 41 of the "Land Act," as amended, by section 6 of the "Land Act Amendment Act, 1901," to enable the Pacific Coast Power Company, Limited, to select therefrom timber limits for wood pulp and paper manufacturing purposes, as provided by an agreement bearing date the 13th day of June, 1901, viz:

Area 1.—All the surveyed land on both sides of Kluge River, and the land surveyed between Kluge River and Bond Sound.

Area 2.—Commencing at the northeast corner of Lot 1; thence following up the river at the head of Thompson's Sound and its branches, a distance of ten miles, and having a width on each side thereof of one mile.

Area 3.—Commencing at the northern boundary of Lots 45, 55 and 56, on the Kluge River; thence north along the said river, and its branches, a distance of ten miles, and having a width on each side of one-half mile, including all surveyed lands.

Area 4.—Commencing on Wakeman Sound at the southwest corner of Lot 61; thence west on the 51st parallel of latitude to a point north of Embley Lagoon; thence south to said lagoon; thence southwesterly following the passage between Kinnaird Island and Pandora Head to Mills Passage; thence to Queen Charlotte Sound; thence southeasterly along the shore line of Noel Channel, and easterly along the centre of Life Sound to Village Point; thence north to the mouth of Kluge River; thence north along the west shore of Wakeman Sound to the point of commencement.

Area 5.—Consisting of Harbledown and Turner Islands.

W. S. GOBE,  
Deputy Commissioner of Lands and Works,  
Lands and Works Department, Victoria,<

## NECUATL AND ANOTHA

Written for the Colonist by T. L. Grahame.

Somewhat more than half a century ago the remnant of the Sasquatch tribe dwelt in the region between Englishman's river and Union bay, but mostly around Qualicum. They were a distant offshoot of the great Hydah tribe, the kings of the northern coast and islands. Partly for this reason and partly for the great deeds done in war by the famous chief of the Sasquatches, Chitla, the tribe were hated by the Cowichans, Nanaimos and still more by the fierce and implacable Eucataws. Indeed, they were held in perpetual feud by those clans; wherever Sasquatch met Eucataw death had a part. The Sasquatch legends told how the glorious Chief Chitla won a signal victory over a combined host of the Cowichans, Nanaimos and Eucataws and almost wiped the last-named clan out of existence. But for the fortunate chance that the Eucataws were at that time filled with ungodly children, then would have been the doom of the proud spirit which ruled the country of the Narrows and all over the region of Cape Mudge.

Yet, after this sanguinary victory, the Sasquatches ran upon evil days. In a sea battle with the Cowichans off Nanaimo bay they lost the flower of their battalions, upwards of two hundred Sasquatch braves dying in that red conflict. Great temptations came upon an expedition from Qualicum to Sechart, and long were the lamentations in the Sasquatch camps for the sacrifice there in the wide gulf. The pestilence next fell upon the sorely tried clan and many more of its children passed away.

So it chanced that fifty years ago the feeble remnant of the once-powerful tribe, a martial clan, skulked amongst the cedar shadows of Qualicum, in mortal dread of their enemies. All along the coast from Skidegate to Tseaco, had been sworn upon the knife by the Eucataw warriors; some day the blow would fall and none would remain of the Sasquatches to pass on the tale of generations of future bearers of that hated name. The only chief that intended to hinder the early execution of the dreadful threat was apprehension of a Hydah reprisal; all the Southland knew too well what the bitter vengeance of the north meant. The Hydahs still were mighty by sea and land; they were king and lords to the Sasquatches, and the Hydahs were to visit them and to visit them in a sanguinary visitation from the Hydah battalions and flotillas. They could still muster about ten thousand warriors armed in what at that time was the greatest pit and able to travel in the greatest canoe navy ever seen on the Pacific Coast.

Hence the policy of the Eucataws was to wait the first suitable opportunity to exterminate their foes. Few white men could realize the enormity of bitter hatred which possessed the descendants of the Eucataw survivors of that great battle when Chitla exited in the frenzy of conquest and invoked the Raven god of battle and victory. The Hydahs, too, were hungry for the Eucataw slain. Only by the extermination of the last of the Sasquatches could the stain of that defeat of a hundred years ago be obliterated. With this deadly purpose the Eucataws trained themselves to patience.

This was the fierce story, crowded into the infant ears of young Necuatl, son of Chief John, the famous leader of the Eucataws. All through the story he heard and youth of the young chief, the same breathings of revenge flamed his dark spirit to flame and made him burn to be the executor of the will of those ancestral warriors who had gone down to defeat before the Hydahs. The Hydahs, too, were hungry for the Eucataw slain. Only by the extermination of the last of the Sasquatches could the stain of that defeat of a hundred years ago be obliterated. With this deadly purpose the Eucataws trained themselves to patience.

### FREEMASONRY.

Instances of Practical Value in Times Of Need.

From Windsor Magazine.

The practical value of freemasonry in time of need has been proved over and over again, and even the stress of battle has not hardened the heart against a brother's sign of distress. Sir A. Alison, the well-known author of "The History of Europe," related an authentic anecdote concerning the famous attack on the Redan during the Crimean war: "During that assault an English officer led a small party of soldiers up to one of the guns placed in a recess of the Redan, and most of the men fell before the fire with which they were received. The others were met by a body of Russians, and the English officer was about to be taken prisoner, when he saw a Russian soldier, the hand of the Russian officer, and had presence of mind enough to give him a masonic grip. The Russian, the Russian in a moment struck up the bayonets of his soldiers led his newly found brother to the rear, and treated him with the kindness of a mason."

An old clerical friend of mine touches for the following: During the gold fever in California an acquaintance of his found himself in the harbor of San Francisco with his ship laden for return, but every seaman was in every direction, and at last ascertained that some of the men were hidden in a crimp's house in the dreaded Chinese quarter. The case was desperate, and so he took his life in his hand and went to the house in question, hoping to get some of them to return to the ship. The room he found crowded with men of all sorts and conditions; but as soon as he was recognized, the doors were drawn, and his last hour appeared to have arrived. By a heavenly inspiration, however, he made a certain sign, whereupon three or four men at once left the crowd and placed themselves on his side, and they not only got him safely away, but induced enough men to return with him to work his ship home again.

Even during the present war the tie of brotherhood has been recognized both by Boers and Englishmen. A colonel of a Canadian regiment at Modder River, on a Sunday morning stroll, strayed too far from his camp, when he suddenly found himself covered by the rifle of a Boer. By a fortunate impulse he made the customary sign, and cried out, "don't shoot, here I am, a brother of yours." The Boer immediately threw down his gun and cried, "brother, inform him that he belonged to 'De Broederland' in Pretoria, and was a member of General Cronje's staff. He begged him to return to his camp at once, and made him accept a valuable coin as a souvenir of his escape. The English 'Rising Sun' lodge was allowed to meet at Bloemfontein throughout the war, and this as a special exception to the rule that no civilians were allowed to be out after 8 p. m. Of all the members of the Dutch lodge 'Vryheid,' it is said that not one was killed, all having fallen in action. The same fate befell all the officers of the Ermelo lodge. We are told that, although four lodges in Natal were taken possession of by the Boers, no damage was done to any of the buildings. The following interesting extract from the American Tyler gives a further proof of this statement: "The masons of Dundee, one of the Natal towns in possession of the Boers, recently erected a very handsome masonic temple, and the structure was religiously respected by the Boers, though at one time some rebels attempted to burn the building. The only Englishman left in Dundee (allowed to remain with his wife, who was nursing a sick person) learned of the attempted looting, and, being a mason, notified a Boer whom he knew to be a mason. The Boer communicated at once with the commandant, and a guard was placed over the building which has remained intact ever since. Shortly after the town of Dundee was taken possession of by the Boers a grand lodge certificate was discovered lying outside an Englishman's house, in the mud—the extent having been so subtle that every one left with what they stood in. This fact came to the knowledge of a Boer commandant, who happened to be a mason, and this building, too, had a guard placed over it and was one of the few houses whose sanctity was respected."

Excursion to Vancouver. Return rate \$2.00, good till July 3rd.

Grand regatta and aquatic and field sports at Ladysmith, July 1. Fifth Regiment and City bands in attendance. Trains leave Victoria at 9 a. m. and 1:30 p. m.

### Money to Loan

### Rapid Growth

### Class "B," Full Paid Stock

On town and city property, homesteads preferred; payments arranged to suit borrowers. Money advanced promptly. Our plan is both simple and perfect, and you know each month what amount you have paid off your mortgage, and what amount is still owing. No loaning on excess of 60 per cent of the present cash value of the property.

The assets of the company have increased from \$107,753.43 At December 31st, 1898, and to \$90,416.20 At December 31st, 1899, and to \$202,953.22 At April 15th, 1901.

Full paid stock is sold at its par value, \$100 per share. A dividend of 6 per cent per annum is payable semi-annually, as per coupons attached to the certificate. This stock is issued for a term of five years, but may be withdrawn after two years.

Head Office, 321 Cambie Street, Vancouver, B.C.

# WEAK BACK

Pains When You Stand  
Pains When You Stoop  
Pains in the Morning  
Pains When Weather Changes

Pains and aches from your hips to your shoulders, pains and weakness all over your body, loss of energy, a tired, stupid, "spring fever" disposition, a general "run down" feeling. For this wear

DR. McLAUGHLIN'S  
ELECTRIC BELT

It pours a gentle stream of electric warmth into the back tissues, nerves and muscles while you sleep at night. The electricity warms and invigorates the feeble tissues, and there is a soothing stream of life pouring into them all night long. They drink it in gladly and respond quickly to its vitalizing spirit. When you get up in the morning your back feels limber, elastic and strong again, and will be cured in a few days.

I guarantee a cure if I say I can cure. I don't ask any one to take chances on my invention. It doesn't cost anything if I fail.

DAILY CURES:

Guelph, Ont., April 18, 1901.  
Dr. McLaughlin: I think of what I was about a year ago and what I am to-day. I can truly say that your Electric Belt has done for me what no other medicine could. I was in a very crippled condition. There were people who did not think I would pull through. Others said I would never leave the use of my knee, but I can now walk as good as ever, with the exception of a slight stiffness in my foot when standing all day. I feel like a new man. I work hard all day and can get in the morning feeling bright and new. All that tired feeling is gone. Yours truly, Peter G. Smith, Box 123.

March 23, 1901.  
Dear Sir, I must now write you to give you a report of my health after wearing your Electric Belt. I wore it as directed for the complaint as described to you in "There were people who did not think I would pull through. Others said I would never leave the use of my knee, but I can now walk as good as ever, with the exception of a slight stiffness in my foot when standing all day. I feel like a new man. I work hard all day and can get in the morning feeling bright and new. All that tired feeling is gone. Yours truly, M. McGee, Ewan, Ont.

IT DOES NOT BURN THE FLESH.

Have you used one of the old style burning belts? Then you can have mine at half-price in exchange. The Dr. McLaughlin Electric Belt has a perfect regulator and special carbon electrodes, and is guaranteed not to burn or blister, and to give a stronger current than any other belt made; warranted to last for years; it repairs or renews flesh. Send in your old belt to-day and get the latest improvements at half-price. The Dr. McLaughlin invention has replaced all the old style curative appliances in the United States. It is the only electric belt which can be used with comfort, while it gives the full benefit of the electric current.

FREE BOOK! Call at my office to-day and let me show you how perfectly it works. Let me prove to you how it makes men and women strong and healthy. If you can't call write for my advice and beautifully illustrated 50-page book. It is a sealed, free. Call or write.

DR. M. C. McLAUGHLIN, 106 Columbia St., SEATTLE, WASHINGTON.

NOTE—WE PAY DUTY

## Massey-Harris Machinery

We have for this season's haying, the old reliable Toronto and Brantford mowers. Also No. 7. This machine has all the good points of the other mowers, and some not found on any other machine. It is up to date in every respect.
